

Katrinus Deluxe

Lomandra longifolia 

STRAPPY
LEAF
PLANTS

Katrinus Deluxe is the new improved form of Katrinus with bigger and better flowers, a finer leaf and a more dense, compact form.

Katrinus Deluxe grows to 700mm high and wide. Flowering in spring, with an abundance of large flower clusters, Katrinus Deluxe grows well in full sun and moderate to heavy shaded positions. It tolerates windy and salt laden windy positions, but avoid foredune situations. It lives on natural rainfall in most of the populated areas in Australia. Ideal for specimen planting or mass planting in gardens, roadsides, golf courses, factories, offices and most types of residential and commercial planting.

Ideal for patio pot plants and planter boxes with its masses of perfumed, yellow flowers.

Katrinus Deluxe strengthens the soil more than any other Lomandra at 366%. Common Lomandra only strengthens the soil 50%. (2007 Paananen, Layt: Study)

Compact with bigger flowers

DESCRIPTION	Improved, semi compact fine leaf
HEIGHT & WIDTH	80cm x 80cm
POSITION	Full sun and moderate to heavy shade
CARE	Water as required for 8-13 weeks until established
USES	Specimen planting or mass planting in gardens, roadsides
SOIL TYPE	Sandy, sandy loam to clay soils
