

GET THE RIGHT TURF for residential use

>> Shade, wear, low maintenance, etc. No turf is best for all situations. Use this as a guide to find the right turf for you.

>> FOR SHADE

Up to **40% shade** Nara native turf or Empire Zoysia
Up to **60% shade** Palmetto Buffalo
Up to **70% shade** Sapphire Buffalo

>> FOR LOWEST MAINTENANCE

If you don't have time to mow and edge, these are the slower growing, lowest maintenance varieties.

Palmetto Soft Leaf Buffalo

The lowest maintenance popular Buffalo in Australia.

Empire Zoysia

Needs 1/3 the mowing of Kikuyu, half that of Couch and 30% less than Buffalo.

>> FOR AVOIDING PESTICIDES

Empire Zoysia or Nara native turf

All Zoysia types such as these are highly resistant to lawn grub, particularly Army Worm and Web Worm.

>> FOR HIGH TRAFFIC

If you have dogs or hard playing kids, these are the best wear tolerance turf.

Full sun Kenda Kikuyu

It has 4 times more underground growth than regular Kikuyu.

Shade and sun Sapphire Buffalo

Number one Buffalo in shade for wear. Not as wear tolerant as Kenda in sun, but it is lower maintenance and works in shade.

>> FOR NEAR SALT WATER

If you live near the ocean or have a salt water pool, these are the best varieties.

Full sun to light shade..... Nara

Nara is far more salt tolerant than Couch, Kikuyu and Buffalo.

Shade and sun Sapphire Buffalo and Palmetto Buffalo

As long as the salt water is no higher than the average for pool salt water, these Buffalos are more salt tolerant than other Buffalos.

THE TURF VARIETIES - more information

Palmetto is a tough, soft leaf Buffalo that is available Australia wide. This turf provides excellent winter colour and can generally out compete weeds when established. Palmetto Buffalo Grass is low maintenance, requiring less watering and less mowing than most other turf varieties. It has less seed head, making it a low allergenic turf choice.

www.palmetto.com.au

Sapphire soft leaf Buffalo is the only Buffalo grass with a fine leaf. Research shows it is the number one Buffalo in shade and also a very drought tolerant grass. It has good wear recovery and good salt tolerance for around salt water pools.

www.sapphireturf.com.au

Empire turf is an easy to look after Zoysia that requires less watering and less mowing. It has good drought and wear tolerance and is a very lawn grub resistant lawn.

www.empireturf.com.au

Nara is the first all purpose Australian native turf. It is a beautiful, fine textured lawn that is faster establishing and lower maintenance. It is a super drought tolerant native with excellent lawn grub resistance. Common Zoysia macrantha is very salt tolerant, so it is no surprise that Nara is the same.

Kenda is a greatly improved form of Kikuyu turf that is very hard wearing. It is a low cost turf option with great winter colour. It is fast to establish and doesn't seed like common Kikuyu. It is not recommended around gardens without hard edges, but if you have a dog or kids, Kenda is a good high wear tolerance option.
