

Gold Velvet

Anigozanthos hybrid 'Gold Velvet' (b)

VELVET KANGAROO PAWS

Truly one of the best landscape Kangaroo Paws available.

- 'Gold Velvet' was bred for toughness and general landscape conditions.
- It is very low maintenance and has very clean, dense foliage with magnificent yellow flowers that reach 1 metre high and are on display for most of the year.
- Its foliage gets to 50-60 centimetres tall.
- Compared to other Kangaroo Paws, 'Gold Velvet' has very high frost and drought tolerance and is more resistant to black spot.
- It needs less trimming or removal of older leaves to keep it looking good compared to other Kangaroo Paws.

Description	Mid-sized Kangaroo Paw
Density	3-5 plants per m ² 2-3 per linear metre
Height & Width	50cm x 40cm
Flowering	Gold flowers from August-May
Best Planting Time	March-November
Uses	Mass planting, planter boxes, flowering garden specimens
Position	Full sun open position Tolerates frost & drought
Soil Type	Well drained soils
Care	Remove older flower stems; fertilise annually
Where It Works	NSW, ACT, VIC, TAS, SA, WA & QLD (in northern QLD it is shorter lived, approx. 2-3 years—south it is longer term)

Tips for long term success with 'Amber Velvet' and 'Gold Velvet' in landscape mass plantings.

- Plant in 75mm of chunky hard wood chip mulch with no fine grade particles. This will help stop weed invasion. Mulch with lots of fines helps germinate weeds.
- Plant 'Amber Velvet' or 'Gold Velvet' behind really ultra low maintenance plants like Little Jess™ Dianella or Tanika® Lomandra. If they get untidy, this will hide it.
- It can also be planted on a random basis through plants that spread slightly such as Little Jess™, Breeze® and King Alfred® Dianella. These Dianellas will help stop weed invasion and cover the ground, while the Velvet Kangaroo Paw will provide masses of rich coloured flowers. E.g: plant 6 Little Jess™ Dianella and one 'Amber Velvet' per m².

'Gold Velvet' planted in between Tanika® Lomandra
