

Baby Citro™

Corymbia citriodora 'Babycit' (b)

ADVANCED TREES

A compact Lemon Scented Gum tree.

- Baby Citro™ *Corymbia* is a grafted compact form of the popular Lemon Scented Gum.
- It has the same clean white trunk and fragrant foliage, but in a denser and more compact form which makes it more suitable for space restricted sites.
- This is a bird attracting tree, excellent for avenue plantings or parklands.
- Protect Baby Citro™ *Corymbia* from frost when young.
- Like all grafted plants, care must be taken to remove all growth below the graft union or these shoots may eventually overrun the plant.

Description	Compact, dense Lemon Scented Gum
Density	1 plant per 3–6 m ² 1 per 6–8 linear metres
Height & Width	5–6m x 4–6m
Flowering	Masses of white flowers in spring
