Compact Size

Disease Resistance

Lower Maintenance

...and more

## No Fuss, Functional, Reliable

**No Fuss:** plants that are easy to care for.

**Functional:** the right plants for the right situation. Whether its green roofs, green walls, rain gardens, roadsides or more, you will find the right functional plant for your situation.

**Reliable:** plants and turf that are tested and proven to work in your region.

For further technical support and information please visit [ozbreed.com.au](http://ozbreed.com.au) where you will find licensed growers and articles on all products.

## A Guide to Our Logos

almost no maintenance and no irrigation. In extra dry environments, very sandy soils and in severe drought occasional top up watering may be required in the warmer months and will provide more beautiful plants.

**Cold Hardy:** Will tolerate cold and frost. Check with your local grower if you are in a severely frost affected area to see if the plant is suitable.

**Highly Recommended for Mass Plantings:** These plants are recommended for mass plantings as they may help reduce weeds, are low maintenance and can generally be used in tough landscapes such as roadsides.

**Drought Tolerant:** When planted in normal gardening conditions these plants generally require no or little irrigation for most populated areas of Australia. Plants will require watering up to 8 to 12 weeks until established. They are often used on roadside plantings, where they receive

## IMPORTANT NOTES

**GROWER KNOWLEDGE:** This is a general catalogue for the region. For local information on which plants work in your area contact your local grower (see our website). Local grower knowledge is vital, and this catalogue is no substitute.

**HEIGHTS:** Heights in this catalogue are for general gardening conditions. In well maintained gardens, some plants will get taller.

**PLANT NAMES:** In this brochure, the genus species and cultivar name are listed like this example: *Lomandra longifolia* 'LM300'. LM300 is the PBR and cultivar name. The brand name or trade name for this plant is TANIKA®, and should not be confused with the true cultivar name. The cultivar or true plant name will always immediately follow the species name enclosed in quotation marks.

**POT SIZES:** In general, most growers have our plants available in tubes and above. Our Advanced Trees range is available in 175mm/5L pots and above only. All other ranges are supplied in tubes and above.

**DISCLAIMER:** This book is copyright. Apart from any fair dealing for the purpose of private study, research, criticism or review as permitted under the Copyright Act, no part may be reproduced by any process without written permission. Enquiries should be addressed to publishers, Ozbreed Pty. Ltd. Ozbreed believes all the information supplied in this book to be correct at the time of printing. They are not, however, in a position to make a guarantee to this effect and accepts no liability in the event of any information proving inaccurate or photo colours being incorrect or cannot be held responsible for plants dying for any reason. Plants are living things and no matter how careful they are used, they sometimes die. Use these plants understanding that no compensation can be claimed from Ozbreed for any loss.

# Plants are Continuously Being Substituted

Substitution of plants can ruin your design. Plants that are of a totally different size, shape or texture are often substituted. Worse still, they are sometimes substituted with plants that will not perform in that situation, or even completely different species.

## Why Do They Substitute?

Usually contractors substitute to save a few percent on price, which helps their profit, or allows them to win the bid. Sometimes it is the supplier selling the wrong plant.

### ***Lomandra confertifolia*: A Bad Substitute**

Sometimes, *Lomandra confertifolia* types are substituted for *Lomandra hystrix* and *longifolia* varieties even though they generally don't survive in tough landscape conditions. *Lomandra confertifolia* occurs naturally only in dry shade and does not perform well in full sun. In comparison to other *Lomandra* types, *Lomandra confertifolia* are weaker, smaller and unable to survive in wet feet.

Our *Lomandra longifolia* and *hystrix* varieties including Tanika®, Katrinus Deluxe®, Nyalla® and Katie Belles™ have been proven to work in tough, low maintenance conditions for years, often staying evergreen when other varieties are browning off.

***Lomandra confertifolia***

**Little Con  
*Lomandra confertifolia***

**Evergreen Baby™ *Lomandra* (left) after two and a half years has no loss to root rot, while *Lomandra confertifolia* (right) has been devastated.**

**Blue *Lomandra confertifolia***

## How Can You Protect Your Design From Substitution?

Ask for a certificate of authenticity in the contract or in the quality assurance documents (see below).

The contractor at the time of purchase must obtain from the supplier a certificate of authenticity that the plants supplied are authentic and true to type. The plants on the certificate must be the same as the ones in the specification.

OR

The contractor at the time of purchase must obtain from the supplier a certificate of authenticity that the plants marked with an \* in the schedule are authentic and true to type. The plants on the certificate must be the same as the ones in the specification.

# QUICK PLANT SELECTION GUIDE

Makes comparing and selecting plants from Ozbreed easier. Each plant has basic information such as its size, uses and position.

## Height

Plants are arranged by height from smallest to tallest by foliage height, and from left to right across each spread.

## More Information

Please see the Ozbreed website for more detailed information on each plant, including tolerances and suitable regions.

## Density Per m2

For dense plant growth, far less gaps and quicker weed control, use the higher rate listed. For the form of the plant to be enhanced, or if you are happy to wait a little longer for weed control, use the lower rate listed. For full specimen planting with larger gaps, a lower density should be used based on your own preference e.g. The recommended rate for Tanika® Lomandra is 3-6/m², you may go as low as 1/m² but there will be no weed control. Some plants control weeds better than others, so consider this if planting for weed control.

## Density Per LM

Linear metre spacing is for hedging or edging plants. As above use the higher rate listed for a denser hedge or edging.

## Range Colour Guide

- STRAPPY LEAF PLANTS
- NATIVE SHRUBS AND GROUND COVERS
- HARDY EXOTIC PLANTS
- ADVANCED TREES
- VELVET KANGAROO PAWS
- ENCORE AZALEAS
- EMPORIUM RANGE OF PLANTS

55cm

<b>Yareena™</b> <i>Myoporum parvifolium</i> 'PARV01' (b)	
Description	Crisp, clean, longer lived Myoporum; masses of white flowers
Size	10cm h x 1m w
Uses	Excellent ground cover, good for coastal positions
Position	Full sun to part shade
Soil Type	Sandy to heavy clay soils
Density	1-2 plants per m²

<b>Aussie Rambler™</b> <i>Carpobrotus glaucescens</i> 'CAR10' (b)	
Description	Native spreading Carpobrotus ground cover with large flowers
Size	20cm h x 2m w
Uses	Ground cover for coastal and inland plantings
Position	Full sun to light shade
Soil Type	Most soil types
Density	1-2 plants per m²

70cm

<b>Blue Horizon™</b> <i>Eremophila glabra prostrate</i> 'EREM1' (b)	
Description	Dense ground cover with blue-grey foliage
Size	25cm h x 1m w
Uses	Mass/specimen planting
Position	Full sun to light shade
Soil Type	Free draining soils; avoid wet feet
Density	1-2 plants per m² 1-2 plants per LM

<b>Pink Pearl™</b> <i>Liriope muscari</i> 'VS001' (b)	
Description	Compact Liriope with elegant green and cream variegated foliage
Size	25cm h x 25cm w
Uses	Borders, mass plantings or as a ground cover
Position	Full sun to heavy shade
Soil Type	All soil types
Density	10-16 plants per m² 4-8 plants per LM

80cm

<b>O So Fine™</b> <i>Gardenia augusta</i> 'KEN04' (b)	
Description	Fine leaf dwarf gardenia with lots of white flowers
Size	Approx. 30cm h x 1m w
Uses	Ground cover, border plant, containers
Position	Full sun to part shade
Soil Type	Well drained moist soils
Density	1-3 plants per m² 1.5-3 plants per LM

<b>Savanna Blue™</b> <i>Lomandra filiformis</i> 'LMF500' (b)	
Description	Compact, fine leaf, blue and tough Lomandra
Size	30cm h x 30cm w
Uses	Mass plantings and specimen gardens
Position	Full sun to part shade
Soil Type	Wide variety of types; prefers free draining
Density	6-12 plants per m² 4-6 plants per LM

### Double Gold™

*Gazania hybrid 'GT20'* (l)

Description	Spreading ground cover with double the flowers
Size	20cm h x 60cm w
Uses	Mass planting, rockeries, roadsides
Position	Full sun
Soil Type	Free draining to heavy draining soils
Density	3–5 plants per m <sup>2</sup> 2–4 plants per LM

### Purple Fusion™

*Scaevola humilis 'PFS100'* (l)

Description	Non-mounding ground cover; masses of small purple flowers for most of the year
Size	20cm h x 1.5m w
Uses	Ground cover
Position	Sun to light shade
Soil Type	Most soil types
Density	1–2 plants per m <sup>2</sup>

### Royal Rambler™

*Grevillea hybrid 'RR01'* (l)

Description	Low growing ground cover Grevillea
Size	20–30cm h x 2–5m w
Uses	Ground cover, specimen plant
Position	Full sun to light shade
Soil Type	Light, well drained soil; sandy to loam; pH below 7
Density	1–2 plants per m <sup>2</sup>

### FlatAz™

*Grevillea hybrid 'GR01'* (l)

Description	Low growing ground cover
Size	20–35cm h x 2–3m w
Uses	Ground cover, mass planting, embankments
Position	Full sun to part shade
Soil Type	Well drained soils; prefers raised gardens/slopes if in heavy poor draining soils; pH below 7
Density	1–3 plants per m <sup>2</sup>

55cm

### Mighty Gold™

*Aloe hybrid 'AL02'* (l)

Description	Compact, tough Aloe
Size	55cm high flowers; 25cm h x 35cm w foliage
Uses	Mass planting, borders, specimen planting
Position	Full sun to part shade
Soil Type	Most soil types; improve drainage in clay soils
Density	4–8 plants per m <sup>2</sup> 3–6 plants per LM

### Aranda™

*Dianella caerulea 'DC150'* (l)

Description	Compact, cane-less, dwarf Dianella
Size	30cm h x 35cm w
Uses	Tidy border plant, mass plantings
Position	Full sun to shade
Soil Type	Sandy loam to free draining clay soils*
Density	6–12 plants per m <sup>2</sup> 3–6 plants per LM

### Gold Cluster™

*Grevillea juniperina 'H22'* (l)

Description	Low growing ground cover Grevillea
Size	30cm h x 80cm–1m w
Uses	Ground cover, specimen plantings
Position	Full sun to part shade
Soil Type	pH below 7, free draining to moderately heavy soils
Density	1–2 plants per m <sup>2</sup>

### Low Horizon™

*Westringia fruticosa 'WES06'* (l)

Description	Tough, dense and compact ground cover
Size	30cm h x 70cm w
Uses	Mass plantings, gardens or as a border plant
Position	Full sun to part shade
Soil Type	Sandy to well drained clay soil types
Density	2–3 plants per m <sup>2</sup> 2–3 plants per LM

70cm

\*Avoid very poor soil.

### Sea Urchin™

*Aloe hybrid 'ANDSEA'* (l)

Description	Compact and dense Aloe
Size	30cm h x 30cm w foliage; 50cm high flowers
Uses	Mass planting, borders, specimen planting
Position	Full sun to part shade
Soil Type	Most soil types
Density	6–12 plants per m <sup>2</sup> 3–6 plants per LM

### Little Phil™

*Philodendron species 'PHIL01'* (l)

Description	Compact clumping habit
Size	35cm h x 35cm w
Uses	Landscape gardens, indoor plant, green walls
Position	Light to moderately heavy shade
Soil Type	Reasonably drained soil with some organics
Density	3–9 plants per m <sup>2</sup> 2–4 plants per LM

### Mighty Coral™

*Aloe hybrid 'AL04'* (l)

Description	Semi-compact Aloe
Size	60cm high flowers; 35cm h x 40cm w foliage
Uses	Mass planting, borders, feature plant
Position	Full sun to part shade
Soil Type	Most soil types; improve drainage in clay soils
Density	3–6 plants per m <sup>2</sup> 2–4 plants per LM

### Silverlawn™

*Liriope muscari 'LIRSS'* (l)

Description	Low growing variegated Liriope
Size	35cm h x 40cm w
Uses	Colour contrast, accent/group plantings
Position	Full sun to heavy shade
Soil Type	Wide variety of types
Density	6–10 plants per m <sup>2</sup> 3–5 plants per LM

2.5m

### Queen Mum™

*Agapanthus orientalis* 'PMN06' [\(b\)](#)

Description	Agapanthus; extra large white and blue flowers
Size	1.5m h x 1.2m w
Uses	Garden beds, borders, patio pots, planter boxes
Position	Full sun–moderate shade
Soil Type	Most soil types
Density	2–4 plants per m² 1.5–3 plants per LM

### Red Fence™

*Photinia x fraseri* 'CP01' [\(b\)](#)

Description	Compact, strong growing Photinia
Size	1.5m h x 1m w after 5 yrs; reaches 2m in good soil
Uses	As a fence, short screen or hedge
Position	Full sun to part shade
Soil Type	Most types
Density	1–2 plants per m² 2 plants per LM

### Katie Belles™

*Lomandra hystrix* 'LHBYF' [\(b\)](#)

Description	Full sized <i>Lomandra hystrix</i> ; mass flowering
Size	1.5–1.8m h x 1.2–1.5m w
Uses	Feature/mass planting; for periodically wet areas
Position	Full sun to heavy shade
Soil Type	Sandy loam to heavy clay
Density	1–3 plants per m² 1–1.5 plants per LM

### Cosmic White™

*Rhaphiolepis indica* 'RAPH01' [\(b\)](#)

Description	Tough Rhaphiolepis with large white flowers
Size	1.5–2m h x 1.5m w
Uses	Hardy shrub for just about any location
Position	Full sun–moderate shade
Soil Type	Sandy to well drained clay soils
Density	1–3 plants per m² 1–1.5 plants per LM

8m

### Dense Fence™

*Viburnum odoratissimum* 'VOC1' [\(b\)](#)

Description	Dense screen; subtle red new growth
Size	2.5m h x 2m w
Uses	Screen, hedge, small feature tree, patio pots
Position	Full sun to part shade
Soil Type	Most types; prefers well drained soil
Density	1–2 plants per m² 1–2 plants per LM

### Slim™

*Callistemon viminalis* 'CV01' [\(b\)](#)

Description	Callistemon with narrow, slimline growth habit
Size	3m h x 1.3m w
Uses	Screen, hedge or feature for tight planting areas
Position	Full sun to part shade
Soil Type	Most soil types
Density	1–3 plants per m² 1–1.5 plants per LM

### Thin Red™

*Photinia x fraseri* 'NP01' [\(b\)](#)

Description	Narrow plant with red new growth foliage
Size	3–4m h x 60cm w
Uses	Screening and hedging for narrow spaces
Position	Full sun to part shade
Soil Type	Most types
Density	1 plant per m² 2 plants per LM

### Quick Fence™

*Viburnum odoratissimum* 'VOQ1' [\(b\)](#)

Description	Fast growing, mid-sized Viburnum shrub
Size	4m h x 2.5m w
Uses	Screening and hedging
Position	Full sun to part shade
Soil Type	Most types; prefers well drained soil
Density	1 plant per 1–2 m² 1 plant per 1–2 LM

10m

### Pinnacle™

*Syzygium australe* 'AATS' [\(b\)](#)

Description	Neat, narrow Lilly Pilly
Size	6–10m h x 1–1.5m w
Uses	Tight planting zones, along fences & driveways
Position	Full sun to part shade
Soil Type	Moist, well drained soils
Density	1 plant per 1–2m² 1–1.5 plants per LM

### Luscious®

*Tristaniopsis laurina* 'DOW10' [\(b\)](#)

Description	Lush and dense form of Tristaniopsis
Size	7–12m h x 5m w
Uses	Street planting, parks and ovals, home gardens
Position	Full sun to part shade
Soil Type	Tolerates a wide range of soils
Density	1 plant per 2–6m² 1 plant per 3–5 LM

### Sweeper®

*Waterhousea floribunda* 'DOW20' [\(b\)](#)

Description	Weeping habit; lush green new growth
Size	10m h x 5–8m w
Uses	Street tree, large screen or hedge
Position	Full sun to part shade
Soil Type	Well drained to heavy clay loam soils
Density	1 plant per 2–6m² 1 plant per 3–8 LM

<b>Macarthur™</b> <i>Callistemon viminalis</i> 'LC01' (L)	
Description	More compact, better flowering Callistemon; bushy growth habit
Size	1.8m h x 1.5m w
Uses	Medium sized shrub
Position	Full sun to part shade
Soil Type	Tolerates most soil conditions
Density	1–2 plants per m² 1–1.5 plants per LM

<b>Naringa™</b> <i>Westringia hybrid</i> 'WES01' (L)	
Description	Fast establishing, hedging Westringia
Size	2.2m x 1.5m unpruned 1m h x 60cm w pruned
Uses	Hedging/specimen plant
Position	Full sun to part shade
Soil Type	Sandy to well drained clay soils
Density	1–2 plants per m² 1–2 plants per LM

<b>Red Alert™</b> <i>Callistemon viminalis</i> 'KPS38' (L)	
Description	Compact, red new growth foliage Callistemon
Size	2–2.4m h x 1.5–2m w unpruned; 60cm–2m h x 50cm–1.5m w pruned
Uses	Hedge, specimen shrub
Position	Full sun to part shade
Soil Type	Most soil types
Density	1–2 plants per m² 1–2 plants per LM

<b>Slender Bells White™</b> <i>Pandorea jasminoides</i> 'PJ01' (L)	
Description	A more dense, compact climber
Size	2–3m h x 40–60cm w pruned; 80cm–2m w unpruned
Uses	Climber, narrow spaces
Position	Full sun to part shade
Soil Type	Most soil types
Density	1–3 per LM

2.5m

<b>Sublime™</b> <i>Acmena smithii</i> 'DOW30' (L)	
Description	Mid sized Acmena tree; lime green new growth
Size	5m h x 2–3m w
Uses	Screening, hedges, garden features
Position	Full sun to part shade
Soil Type	Well drained to heavy clay loams
Density	1 plant per 1.5–5m² 1 plant per 2–3 LM

<b>Straight and Narrow™</b> <i>Syzygium australe</i> 'SAN01' (L)	
Description	Slender, semi-compact, Psyllid resistant Lilly Pilly
Size	5–8m h x 1–1.5m w
Uses	Constricted planting areas and topiary
Position	Full sun to shade
Soil Type	Moist, well drained soils
Density	1 plant per 1–2m² 1–1.5 per LM

<b>Red Head™</b> <i>Acmena smithii</i> 'BWNRED' (L)	
Description	Psyllid resistant tree with dense foliage
Size	6m h x 2.5m w
Uses	Hedging and specimen planting
Position	Full sun to part shade
Soil Type	Well drained to heavy clay soil types
Density	1 plant per 1–5m² 1 plant per 1–2 LM

<b>Podium™</b> <i>Ficus brachypoda</i> 'BWNPOD' (L)	
Description	Compact, domed Ficus
Size	6–9m h x 6–9m w
Uses	Shade tree, streetscapes, parks and for large containers
Position	Full sun to part shade
Soil Type	Most soil types; avoid wet feet
Density	1 plant per 8–10 LM

8m

Still need help selecting the right plant?

Visit [bestplants.com.au](https://bestplants.com.au)

This website from Ozbreed helps you find the best plants for you, whether its for a rooftop, rain garden, modern garden or something else. Simply choose the options that suit you to show a selection of plants that will work.

# TOP PLANTS FOR DIFFERENT USES

## Top Plants for Mass Planting

Shara™ Lomandra

The following ten plants have proven over time to handle the tough conditions of low maintenance mass plantings. There is a wide variety of shrubs, ground covers and strappy leaf plants in this selection that are drought tolerant, cold hardy and look great planted en masse.

<b>Grey Box™</b> <i>Westringia fruticosa</i> 'WES04' (b)	Compact ball shape; partially wet or dry
<b>Mundi™</b> <i>Westringia fruticosa</i> 'WES05' (b)	Ground cover, small white flowers
<b>Tanika®</b> <i>Lomandra longifolia</i> 'LM300' (b)	Improved, compact, fine leaf form
<b>Shara™</b> <i>Lomandra fluviatilis</i> 'ABU7' (b)	Fine leaf, compact; partially wet or dry
<b>Little Jess™</b> <i>Dianella caerulea</i> 'DCMP01' (b)	Compact, dwarf Flax Lily
<b>Nyalla®</b> <i>Lomandra longifolia</i> 'LM400' (b)	Semi-compact blue-grey fine leaf
<b>Just Right®</b> <i>Liriope muscari</i> 'LIRJ' (b)	Evergreen, clean growing Liriope
<b>Aussie Rambler™</b> <i>Carpobrotus glaucescens</i> 'CAR10' (b)	Spreading ground cover; large flowers
<b>Lucia™</b> <i>Dianella caerulea</i> 'DC101' (b)	Low growing, spreading Dianella
<b>Green John™</b> <i>Callistemon viminalis</i> 'LJ23' (b)	Compact Callistemon with green foliage

Grey Box™ Westringia

## Top Shade Plants

These plants can work in very heavily shaded positions.

<b>Just Right®</b> <i>Liriope muscari</i> 'LIRJ' (b)	Evergreen, clean growing Liriope
<b>Amethyst™</b> <i>Liriope muscari</i> 'LIRTP' (b)	Compact foliage, deep purple flowers
<b>Isabella®</b> <i>Liriope muscari</i> 'LIRF' (b)	Fine leaf, compact, spreading Liriope
<b>Pink Pearl™</b> <i>Liriope muscari</i> 'VS001' (b)	Compact, variegated green and cream foliage
<b>Silverlawn™</b> <i>Liriope muscari</i> 'LIRSS' (b)	Low growing, variegated; looks silver from a distance
<b>Pure Blonde™</b> <i>Liriope muscari</i> 'LIRBLONDE' (b)	<i>Tough with blonde foliage in spring</i>
<b>Tropic Cascade™</b> <i>Lomandra hystrix</i> 'LHWP' (b)	<i>Lomandra hystrix</i> with weeping foliage
<b>Katie Belles™</b> <i>Lomandra hystrix</i> 'LHBYF' (b)	Full sized <i>Lomandra hystrix</i> ; mass flowering
<b>Tasred®</b> <i>Dianella tasmanica</i> 'TR20' (b)	Contrasting green and red toned foliage

Isabella® Liriope

## Top Greenwall Plants

We recommend using these plants for greenwalls based on trials. See the research on our website for more information and tips for a successful greenwall: [ozbreed.com.au/landscape-gardening-plants-and-turf-research](http://ozbreed.com.au/landscape-gardening-plants-and-turf-research).

<b>Shara™</b> <i>Lomandra fluviatilis</i> 'ABU7' (b)	Fine leaf, compact; partially wet or dry
<b>Tanika®</b> <i>Lomandra longifolia</i> 'LM300' (b)	Improved, compact, fine leaf form
<b>Tropic Cascade™</b> <i>Lomandra hystrix</i> 'LHWP' (b)	<i>Lomandra hystrix</i> with weeping foliage
<b>Grey Box™</b> <i>Westringia fruticosa</i> 'WES04' (b)	Compact ball shape; partially wet or dry
<b>Mundi™</b> <i>Westringia fruticosa</i> 'WES05' (b)	Ground cover, small white flowers
<b>Just Right®</b> <i>Liriope muscari</i> 'LIRJ' (b)	Evergreen, clean growing Liriope
<b>Amethyst™</b> <i>Liriope muscari</i> 'LIRTP' (b)	Compact foliage, deep purple flowers
<b>Silverlawn™</b> <i>Liriope muscari</i> 'LIRSS' (b)	Low growing, variegated; looks silver from a distance
<b>Obsession™</b> <i>Nandina domestica</i> 'SEIKA' (b)	Red dwarf Nandina; red foliage 9 months of the year
<b>Little Ruby™</b> <i>Alternanthera dentata</i> 'LRU30' (b)	Compact, spreading ground cover with deep burgundy foliage

Top Rain Garden Plants

A recent study has shown that the following type of plants are suitable for rain gardens. For more information, see [ozbreed.com.au/landscape-gardening-plants-and-turf-research](http://ozbreed.com.au/landscape-gardening-plants-and-turf-research).

<b>Shara™</b> <i>Lomandra fluviatilis</i> 'ABU7' (l)	Fine leaf, compact; partially wet or dry
<b>Katie Belles™</b> <i>Lomandra hystrix</i> 'LHBYF' (l)	Full sized <i>Lomandra hystrix</i> ; mass flowering
<b>Tropic Cascade™</b> <i>Lomandra hystrix</i> 'LHWP' (l)	<i>Lomandra hystrix</i> with weeping foliage
<b>Nafray®</b> <i>Pennisetum alopecuroides</i> 'PA300' (l)	Compact, clumping native grass
<b>Pennstripe™</b> <i>Pennisetum alopecuroides</i> 'PAV300' (l)	Variegated, compact clumping grass
<b>Purple Lea®</b> <i>Pennisetum alopecuroides</i> 'PA400' (l)	Showy, clumping plant; purple flowers
<b>Feather Top™</b> <i>Baloskion tetraphyllum</i>	Clumping perennial herb
<b>Twizzler™</b> <i>Lepironia articulata</i>	Twisted, glaucous reed-like foliage
<b>Grey Box™</b> <i>Westringia fruticosa</i> 'WES04' (l)	Compact ball shape; partially wet or dry
<b>Just Right®</b> <i>Liriope muscari</i> 'LIRJ' (l)	Evergreen, clean growing Liriope

Top Salt Tolerant Plants

These plants were chosen based on research or common knowledge. For more information and the full paper, see [ozbreed.com.au/landscape-gardening-plants-and-turf-research](http://ozbreed.com.au/landscape-gardening-plants-and-turf-research).

<b>King Alfred®</b> <i>Dianella caerulea</i> 'JOHN316' (l)	Dense, compact blue-green foliage
<b>Nyalla®</b> <i>Lomandra longifolia</i> 'LM400' (l)	Semi-compact blue-grey fine leaf
<b>Cosmic White™</b> <i>Raphiolepis indica</i> 'RAPH01' (l)	Tough Raphiolepis; large white flowers
<b>Cosmic Pink™</b> <i>Raphiolepis indica</i> 'RAPH02' (l)	Tough Raphiolepis; large pink flowers
<b>Ozbreed Aussie Box®</b> <i>Westringia hybrid</i> 'WES08' (l)	Native box hedge; tight, compact growth
<b>Grey Box™</b> <i>Westringia fruticosa</i> 'WES04' (l)	Compact ball shape; partially wet or dry
<b>Mundi™</b> <i>Westringia fruticosa</i> 'WES05' (l)	Ground cover, small white flowers
<b>Naringa™</b> <i>Westringia hybrid</i> 'WES01' (l)	Fast establishing, hedging Westringia
<b>Blue Gem™</b> <i>Westringia hybrid</i> 'WES03' (l)	Shrubby Westringia; masses of flowers
<b>Aussie Rambler™</b> <i>Carpobrotus glaucescens</i> 'CAR10' (l)	Spreading ground cover; large flowers
<b>Katie Belles™</b> <i>Lomandra hystrix</i> 'LHBYF' (l)	Full sized <i>Lomandra hystrix</i> ; mass flowering

Top Screening Plants

These shrubs are excellent for creating privacy.

<b>Slim™</b> <i>Callistemon viminalis</i> 'CV01' (l)	Narrow, slimline growth habit
<b>Sublime™</b> <i>Acmena smithii</i> 'DOW30' (l)	Mid-sized Acmena tree; lime green new growth foliage
<b>Red Head™</b> <i>Acmena smithii</i> 'BWNRED' (l)	Psyllid resistant tree with dense foliage
<b>Pinnacle™</b> <i>Syzygium australe</i> 'AATS' (l)	Neat, narrow Lilly Pilly
<b>Sweeper®</b> <i>Waterhousea floribunda</i> 'DOW20' (l)	Weeping habit, lush green new growth
<b>Quick Fence™</b> <i>Viburnum odoratissimum</i> 'VOQ1' (l)	Quick growing Viburnum; glossy green foliage
<b>Dense Fence™</b> <i>Viburnum odoratissimum</i> 'VOC1' (l)	Dense screen with subtle red new growth
<b>Straight and Narrow™</b> <i>Syzygium australe</i> 'SAN01' (l)	Psyllid resistant Lilly Pilly; naturally very narrow growing

## Top Greenroof Plants

These plants were selected based on research from the University of Western Sydney, a USA Texas study and similar plants. See [ozbreed.com.au/landscape-gardening-plants-and-turf-research](http://ozbreed.com.au/landscape-gardening-plants-and-turf-research) for more information, including the full paper.

<b>Shara™</b> <i>Lomandra fluviatilis</i> 'ABU7' (l)	Fine leaf, compact; partially wet or dry
<b>Mundi™</b> <i>Westringia fruticosa</i> 'WES05' (l)	Ground cover, small white flowers
<b>Yareena™</b> <i>Myoporum parvifolium</i> 'PARV01' (l)	Crisp, clean, longer lived foliage
<b>Tanika®</b> <i>Lomandra longifolia</i> 'LM300' (l)	Improved, compact, fine leaf form
<b>Green John™</b> <i>Callistemon viminalis</i> 'LJ23' (l)	Compact Callistemon with green foliage
<b>Double Gold™</b> <i>Gazania hybrid</i> 'GT20' (l)	Spreading ground cover; more flowers
<b>Grey Box™</b> <i>Westringia fruticosa</i> 'WES04' (l)	Compact ball shaped plant; part wet or dry
<b>Lucia™</b> <i>Dianella caerulea</i> 'DC101' (l)	Low growing, spreading Dianella
<b>Aussie Rambler™</b> <i>Carpobrotus glaucescens</i> 'CAR10' (l)	Spreading ground cover; large flowers
<b>Nafray®</b> <i>Pennisetum alopecuroides</i> 'PA300' (l)	Compact, clumping native grass

## Top Erosion Control Plants

From the research paper *Quantifying the Strengthening of Soil By Commonly Used Landscape Plants*. See [ozbreed.com.au/landscape-gardening-plants-and-turf-research](http://ozbreed.com.au/landscape-gardening-plants-and-turf-research) for more information, including the full paper.

<b>Nafray®</b> <i>Pennisetum alopecuroides</i> 'PA300' (l)	Compact, clumping native grass
<b>Katrinus Deluxe</b> <i>Lomandra longifolia</i> 'Katrinus Deluxe' (l)	Improved semi-compact fine leaf form
<b>Nyalla®</b> <i>Lomandra longifolia</i> 'LM400' (l)	Semi-compact blue-grey fine leaf
<b>Breeze®</b> <i>Dianella caerulea</i> 'DCNCO' (l)	'No cane' <i>Dianella caerulea</i>
<b>Katie Belles™</b> <i>Lomandra hystrix</i> 'LHBYF' (l)	Full sized <i>Lomandra hystrix</i> ; mass flowering
<b>Shara™</b> <i>Lomandra fluviatilis</i> 'ABU7' (l)	Fine leaf, compact; partially wet or dry
<b>Tropic Cascade™</b> <i>Lomandra hystrix</i> 'LHWP' (l)	<i>Lomandra hystrix</i> with weeping foliage
<b>Lucia™</b> <i>Dianella caerulea</i> 'DC101' (l)	Low growing, spreading Dianella
<b>Tanika®</b> <i>Lomandra longifolia</i> 'LM300' (l)	Improved, compact, fine leaf form
<b>Yalba™</b> <i>Imperata cylindrica</i> 'ICL200' (l)	Fast spread, masses of feathery plumes

## Top Fire Retardant Plants

The top fire retardant plants in this list are based on scientific evidence and suggestions from various articles. See [ozbreed.com.au/landscape-gardening-plants-and-turf-research](http://ozbreed.com.au/landscape-gardening-plants-and-turf-research) for more information.

Please note that any plant can burn when exposed to enough flames and heat, it is just that some are less likely, or may take longer to ignite. For this reason you cannot rely on plant selection alone to stop bush fires, but it makes sense to use plants that generally delay in their ignition.

<b>Tanika®</b> <i>Lomandra longifolia</i> 'LM300' (l)	Improved, compact, fine leaf form
<b>Nyalla®</b> <i>Lomandra longifolia</i> 'LM400' (l)	Semi-compact blue-grey fine leaf
<b>Katrinus Deluxe</b> <i>Lomandra longifolia</i> 'Katrinus Deluxe' (l)	Improved semi-compact fine leaf form
<b>Gold Velvet</b> <i>Anigozanthos hybrid</i> 'Gold Velvet' (l)	Mid-sized Kangaroo Paw; yellow flowers
<b>Amber Velvet</b> <i>Anigozanthos hybrid</i> 'Amber Velvet' (l)	Mid-sized Kangaroo Paw; red/ yellow flower
<b>Regal Velvet</b> <i>Anigozanthos hybrid</i> 'Regal Velvet' (l)	Mid-sized Kangaroo Paw; red/ green flower
<b>Ruby Velvet™</b> <i>Anigozanthos hybrid</i>	Mid-sized Kangaroo Paw; red flowers
<b>Free Fall™</b> <i>Casuarina glauca prostrate</i> 'CAS01' (l)	Wide spreading ground cover

<b>Cloudy Days</b> <i>Agapanthus orientalis</i> 'Cloudy Days' (l)	Mid-sized; dual coloured flowers

## Screening & Hedging Plants

.....  
**Want to keep those nosy neighbours out?**  
.....

**Visit [screenhedgeplants.com.au](http://screenhedgeplants.com.au)**

Another fantastic website developed by Ozbreed to help you find a hedging and screening plant to suit your needs.

# Know Your Lomandras

1

## 1. Evergreen Baby™ *Lomandra labill.* 'LM600' PBR

Tough, compact, fine leaf, wet feet & drought tolerant, 100% Phytophthora resistant (at time of printing). 40–45cm H x 45cm W

2

## 2. Shara™ *Lomandra fuvialis* 'ABU7' PBR

Tidy, tough, compact, fine leaf, humidity & drought tolerant, 100% Phytophthora resistant (at time of printing). 55cm H x 50cm W

3

## 3. Tanika® *Lomandra longifolia* 'LM300' PBR

Reliable, tough, fine leaf, very drought tolerant, low maintenance, soft evergreen foliage. 50–60cm H x 65cm W

4

## 4. Tropic Cascade™ *Lomandra hystrix* 'LHWP' PBR

Compact weeping foliage, handles periodic wet feet, highly Phytophthora resistant, good erosion control option. 60–80cm H x 60–80cm W

5

## 5. *Lomandra longifolia* 'KATRINUS DELUXE' PBR

Clean growing, uniform, great erosion control plant, can survive on natural rain fall, frost & drought tolerant. 70cm H x 70cm W

6

## 6. Nyalla® *Lomandra longifolia* 'LM400' PBR

Toughest for coastal & salt laden winds, versatile, low maintenance, good erosion control, drought & cold tolerant. 80–90cm H x 80–90cm W

7

## 7. Lucky Stripe™ *Lomandra hystrix* 'LMV200' PBR

Reliable, tough, ultra clean variegated foliage, drought & humidity tolerant, long lived, highly Phytophthora resistant. 80cm–1m H x 90cm W

8

## 8. Katie Belles™ *Lomandra hystrix* 'LHBYF' PBR

Best performing, evergreen Australian native rain garden plant, drought, cold & coast tolerant, highly Phytophthora resistant. 1.5–1.8m H x 1.2–1.5m W

\*Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state

# Know Your Westringias

2000mm

1000mm

300mm

1

## 1. Low Horizon™ *Westringia fruticosa* 'WES06' PBR

Dense, ultra-compact ground cover Westringia. It is the lowest maintenance ground cover Westringia available. 30cm H x 70cm W

2

## 2. Grey Box™ *Westringia fruticosa* 'WES04' PBR

Provides great colour contrast with grey foliage and white flowers. Great as a low hedge, or left in its natural ball shape. 30–45cm H x 30–45cm W (unpruned), 30cm H x 30cm W (pruned)

3

## 3. Mundi™ *Westringia fruticosa* 'WES05' PBR

A tough, beautiful and versatile ground cover. Can be left unpruned whilst still maintaining a tidy form. Masses of white flowers. 40–50cm H x 1.5m W

4

## 4. Ozbreed Aussie Box® *Westringia hybrid* 'WES08' PBR

A great native alternative to exotic box plants, and generally requires less pruning than other Westringias. Drought tolerant. 70–95cm H x 70–95cm W (unpruned), 40–60cm H x 40–60cm W (pruned)

5

## 5. Blue Gem™ *Westringia hybrid* 'WES03' PBR

One of the most vivid flowering Westringia available, with amazing bluish-purple flowers. Great in native gardens. 1–1.5m H x 80cm–1.3m W

6

## 6. Naringa™ *Westringia hybrid* 'WES01' PBR

One of the best hedging Westringia available for medium to tall hedges. Very fast establishing hedge, requires less pruning than other Westringia. 2.2m H x 1.5m W (unpruned), 1m H x 60cm wide (pruned)

*\*Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state*

# Know Your Liriopes

1

## **1. Pink Pearl™ *Liriope muscari* 'VS001' PBR**

Elegant cream and green variegated foliage. Tough plant in both sun and shade. Vibrant pink flowers. Compact & low growing.  
25cm H x 25cm W

2

## **2. Pure Blonde™ *Liriope muscari* 'LIRBLONDE' PBR**

Stunning blonde foliage in spring. Clumping plant. Still tough but performs better protected from wind & full sun. Limited supply available.  
30cm H x 40cm W

3

## **3. Silverlawn™ *Liriope muscari* 'LIRSS' PBR**

Clean variegated foliage. Looks almost silver from a distance. Excellent low growing contrast plant. Superb lawn alternative for heavily shaded areas.  
35cm H x 40cm W

4

## **4. Isabella® *Liriope muscari* 'LIRF' PBR**

Great as a garden border, or as a mow once per year lawn alternative for heavily shaded areas. Better performer than Mondo in drought, full sun and frost.  
40cm H x 50cm W (15–20cm H x 20–30cm W when mown once a year)

5

## **5. Amethyst™ *Liriope muscari* 'LIRTP' PBR**

Compact Liriope with dark green foliage that contrast with deep purple flowers that sit well above the foliage. Grows well all over Australia.  
40cm H x 40cm W

6

## **6. Just Right® *Liriope muscari* 'LIRJ' PBR**

Best landscape Liriope available. Consistent height that is 'just right' for landscapes. More evergreen and works all over Australia. Rarely, if ever, produces viable seed. 50cm H x 50cm W

*\*Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state*

# Know Your Lilly Pillies

1

## 1. Sublime™ *Acmena smithii* 'DOW30' PBR

Lush, lime green new growth. Dense foliage to ground. Extremely Psyllid resistant. Highly Myrtle Rust resistant. 5m H x 2-3m W

2

## 2. Red Head™ *Acmena smithii* 'BWNRED' PBR

Dense foliage with red new growth. Extremely Psyllid resistant. Highly Myrtle Rust resistant. Fire retardant. 6m H x 2m W

3

## 3. Straight and Narrow™ *Syzygium australe* 'SAN01' PBR

Naturally very narrow growing. Excellent screen or hedge for tight planting areas. Psyllid resistant Lilly Pilly. 5-8m H x 1-1.5m W

4

## 4. Pinnacle™ *Syzygium australe* 'AATS' PBR

Very narrow growing native tree. Provides sculptured design for tight planting areas. Requires less pruning to stay narrow. 6-10m H x 1-1.5m W

5

## 5. Sweeper® *Waterhousea floribunda* 'DOW20' PBR

Improved variety with heavy weeping habit. Much denser form. Highly Myrtle Rust resistant. Excellent large, dense screen. 10m H x 5-8m W

*\*Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state*

# Know Your Callistemon

1

## 1. Green John™ *Callistemon viminalis* 'LJ23' PBR

Light green new growth, good contrast to Better John™ Callistemon. Denser and faster growing than Little John. Highly Myrtle Rust resistant. 60cm-1m H x 60cm W

2

## 2. Better John™ *Callistemon viminalis* 'LJ1' PBR

A 'Better John' bred from Little John. Easier to grow, quicker to establish and better blue-green toned mature foliage colour. 60cm-1.2m H x 60-90cm W

3

## 3. Scarlet Flame™ *Callistemon viminalis* 'CC19' PBR

Ultra-compact form, fine leaf, bred from Captain Cook. Beautiful rustic red new growth, showy red flowers, self cleaning. 60cm-1.5m H x 60cm-1m W

*\*Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state*

4

## 4. Macarthur™ *Callistemon viminalis* 'LC01' PBR

Incorporates both Little John and Captain Cook. Feature more compact growth habit and better flower presentation. Bushy & tidy growth. Myrtle Rust resistant. 1.8m H x 1.5m W

5

## 5. Red Alert™ *Callistemon viminalis* 'KPS38' PBR

Compact Callistemon hedge with vivid red new growth. Native alternative to Photinia. Part of the Ozbreed No Bees Please™ program. 2-2.4m H x 1.5-2m W (unpruned), 50cm-2m H x 40cm-1.5m W (pruned)

6

## 6. Slim™ *Callistemon viminalis* 'CV01' PBR

Unique narrow growth habit. Bottlebrush solution for tight planting areas. Great screen or hedge. Highly Myrtle Rust resistant. 3m H x 1.3m W

# Know Your Dianellas

1

## 1. Aranda™ *Dianella caerulea* 'DC150' PBR

A compact, dwarf form, very tight rhizome growth, small spread. Tidy border plant, slightly arching foliage. Cane-less Dianella. 30cm H x 35cm W

2

## 2. Lucia™ *Dianella caerulea* 'DC101' PBR

Low growing, excellent spreading Dianella. Best spreading Dianella for roadsides/median stripes, low cost ground cover option. 30–40cm H x 50cm W

3

## 3. Little Jess™ *Dianella caerulea* 'DCMP01' PBR

Best selling Dianella, almost a decade of proven performance. Dwarf, clumping growth habit. Very short compact canes, low maintenance. 40cm H x 40cm W

4

## 4. Tasred® *Dianella tasmanica* 'TR20' PBR

Tough, adaptable & reliable. Best performing, biggest selling Dianella tasmanica in Australia. Great colour contrast. 45cm H x 40–50cm W

5

## 5. Revelation® *Dianella revoluta* 'DRG04' PBR

Best performing Dianella through recent wet. Cleaner blue green foliage with more flowers. Can survive on natural rainfall. 50cm H x 50cm W

6

## 6. Clarity Blue™ *Dianella hybrid* 'DP401' PBR

A cross between Cassa Blue® and Utopia® Dianella. Clean blue foliage with a clumping habit. Handles periodic wet feet. 55cm H x 45cm W

7

## 7. Breeze® *Dianella caerulea* 'DCNC0' PBR

Tidy 'no-cane' variety. Tough ground cover plant. Great for erosion control. Fast establishing, spreads quickly, outcompetes weeds. 60–70cm H x 60–70cm W

8

## 8. Wyeena® *Dianella tasmanica* 'TAS300' PBR

Striking variegated clean foliage. Robust, outcompetes weeds. Very good frost tolerance. Great background plant. 80–90cm H x 80–90cm W

\*Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state

## SPECIFICATION NOTES: Roadside Plant Placement

Almost no maintenance, no irrigation plants

*Developed through consultation with Roads Departments and observation of road side plantings over the last 10 years. Note: If sub-standard processed mulch is used with lots of fine grade material, it can increase the likely-hood of root rot diseases. So it is recommended to only use the following plants...*

### Depressed or raised with fine grade mulch

*Use any of the following plants: Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra.*

### Raised median strips

*Use any of the following plants: Tanika®, Nyalla®, Shara™ and Evergreen Baby™ Lomandra and Little Jess™, Breeze®, Revelation® and Lucia™ (in good soils) Dianella. We suggest using coarse grade mulch with no fines for all roadside applications.*

### Depressed or raised area with chunky mulch and no fines

*Use any of the following plants for depressed areas: Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra.*

*Use any of the following plants for raised areas: Tanika®, Nyalla®, Shara™ and Evergreen Baby™ Lomandra and Little Jess™, Breeze®, Revelation® and Lucia™ (in good soils) Dianella.*

### Depressed Median Strips

*Use any of the following plants: Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra. These plants cope better with prolonged wet feet, as well as dry conditions.*

### **Raised areas on the side of the road**

*Use any of the following plants: Tanika®, Nyalla®, Shara™ and Evergreen Baby™ Lomandra and Little Jess™, Breeze®, Revelation® and Lucia™ (in good soils) Dianella.*

### **Depressed areas on the side of the road**

*Use any of the following plants: Shara™, Evergreen Baby™ Katie Belles™ and Tropic Cascade™ Lomandra.*

### **Batters and sloping areas**

*Use any of the following plants:*

*Tanika®, Nyalla® Lomandra*

*and Little Jess™, Breeze®,*

*Revelation® and Lucia™ (in good*

*soils) Dianella. All these plants do well*

*in this situation, with Tanika® Lomandra being the*

*stand out, with its ability to stay even more evergreen in the most extreme droughts.*

### **Downside of path (depressed)**

*Use any of the following plants: Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra. Water running off a path or roads results in far more wet feet for plants on the down side of the path.*

### **Upside of path (raised)**

*Use any of the following plants: Tanika®, Nyalla®, Shara™ and Evergreen Baby™ Lomandra and Little Jess™, Breeze®, Revelation® and Lucia™ (in good soils) Dianella.*

# Evaluation and Development of New Green Life Alternatives for Bio-retention Swales and Erosion

## Plant Erosion Control Research Update

Quantifying which plant types are best suited to surface erosion protection on slopes, batters and swales

1) Strappy leaf plants and grasses generally strengthen the soil 5 to 20 times more than shrubs and ground covers.

The following tables detail the best soil strengthening plants based on research completed.

2) Testing used a ground shear tester on replicated samples in ground and in pots.

3) This research calculates the average amount a plant strengthens the soil in percentages and kPa (kilopascals), which is useful for erosion control professionals to choose the appropriate plant.

### Plant shear vane test results and statistics for Clarendon, NSW. The following plants all strengthened the soil significantly.

Groups	Difference to bare soil	Significant?	% increase vs bare soil	Shear strength kPa
Little Rev™ ■	1.39	YES	161%	22.8
Carex appressa	1.52	YES	176%	23.8
Little Jess™	1.55	YES	181%	24.3
Tasred® ■	2.15	YES	250%	29.6
Tanika® ■	2.15	YES	250%	29.5
Agapanthus	2.43	YES	283%	32
Lucia™ *	N/A	YES	433.75%	49.3
Tropic Cascade™ * x	N/A	YES	159%	18.6
Shara™ *	N/A	YES	225%	26.2
Best 6 Plants				
Katie Belles™	2.45	YES	285%	32.3
Breeze®	2.56	YES	297%	33.2
Nyalla® ■	2.82	YES	328%	36.1
Katrinus Deluxe (b)	3.15	YES	366%	39.6
Nafray®	4.08	YES	475%	50.3
King Alfred® ●	6.46	YES	752%	70

- Not recommended for QLD. x Not suited to ACT.
- \* Based on separate, later test.
- Needs cutting back every 18 months to two years.

# Testing plants for inundation tolerance in Bio-retention swales.

1) Evergreen plants look better, and most importantly do not have long dormant periods of low nutrient reduction. Eg; wet feet tolerant evergreen Lomandra removes heavy metals and nutrients all year round, whilst Carex and Juncus are often brown and dormant for up to 6 months of the year.

Carex and Juncus going brown, reducing nutrient absorption

## Rating of Bio-retention swale planting 2017

	Avg. rating over 3 plants 0=dead 10=mostly healthy
Exotic types with low or no seed set	
Amethyst™ Liriope	5
Just Right® Liriope	7
Cosmic Pink™ Rhipirolepis	7
Cosmic White™ Rhipirolepis	9
Obsession™ Nandina	0
Blush™ Nandina	9
Native types	
Shara™ Lomandra	9
Lucky Stripe™ Lomandra	8
Evergreen Baby™ Lomandra	7
Tanika® Lomandra	0
Tropic Cascade™ Lomandra	8
Katie Belles™ Lomandra	8
Little Jess™ Dianella	3
Lucia™ Dianella	4
Better John™ Callistemon	9
Green John™ Callistemon	9
Macarthur™ Callistemon	9
Slim™ Callistemon	9
Luscious® Tristaniopsis	4
Ozbreed Aussie Box® Westringia	6
Grey Box™ Westringia	9
Low Horizon™ Westringia	6
Mundi™ Westringia	9
Naringa™ Westringia	4

Note: planted winter 2016. Just over two years old at rating. Rounded to nearest number. Mostly rated based on three plants per type.

2) Many new ornamental plants that have superior looks and performance are showing good wet feet tolerance for Bio-retention swales that get periodically inundated.

3) Many of the new wet feet tolerant plants also have far superior drought tolerance.

4) New breeding has greatly increased the wet feet ability of certain plants. Eg; Westringia is not normally able to handle long periods of wet, but Grey Box™ Westringia, and Mundi™ Westringia have shown amazing abilities to handle wet.

## Previous trials in drainage swale 2008–2017

	Avg. rating over 3 plants 0=dead 10=mostly healthy

# STAYMULCH™

**Erosion Control and  
Soil Stabilisation  
Hemp Mulch**

## HIGH CELLULOSE CONTENT

The only commercially available mulch with high cellulose content. Cellulose is used in worm farms and has amazing benefits as a soil conditioner, especially in promoting soil microbes and turning a dead soil into a living soil.

## STAYS WHERE YOU LAY IT

With its naturally occurring resinous compounds and its stringy nature, StayMulch™ helps hold the mulch in place. Less likely to displace in wind and rain.

## IMPROVES SOIL FOR COMMERCIAL PLANTINGS

For commercial large plantings, it is an excellent grow-in mulch. Use StayMulch™ for the first year to promote quicker and healthier growth. However, for long term plant health with less maintenance, keep using it!

## GOOD FOR WEED PREVENTION

It is also more difficult for weed seed to germinate in StayMulch™ compared to most other mulch types.

### STAYS WHERE YOU LAY IT

The stringy components prevent StayMulch™ from blowing away, assisting with erosion control

### IMPROVES SOIL

StayMulch™ turns dead soil into living soil through high cellulose content

## StayMulch™ vs erosion control blankets

- Far less likely to become hydrophobic
- Enhances the growth and provides food for a living soil
- Provides a great surface erosion control, with no pegs
- Will not roll up in big pieces
- StayMulch™ sticks together when water is added

## StayMulch™ vs regular mulch

- Less likely to wash or blow away in water flows, paths or roads
- Holds far better on slopes
- The high cellulose content turns many poor soils to living healthy soils
- Grows plants to maturity faster
- Stops weeds better than mulch with fines

## More benefits of StayMulch™

- Out-performed all other commonly used materials as a mulch and for preventing soil erosion
- Longer lasting than Pea Straw, Sugar Cane Mulch and other straw types
- Its two distinct fibre types bind together, forming a mat that has superior weed suppressing characteristics
- Excellent water penetration and retention qualities
- StayMulch™ is free from chemical input during growth and manufacture, making it beneficial to the environment
- Soil conditioning and fertilising mulch

## StayMulch™ Uses

- Erosion Control
- Commercial mulch that doubles as a soil conditioner
- Roadside plantings
- For general home ornamental, vegetable and bedding plantings (raised gardens, containers and planter boxes)
- Fruit trees, vines and cropping
- Compost “helper”— allows effective separation of wet materials to discourage anaerobic conditions
- DO NOT USE on moderate to high water flow areas, such as lining the side of streams

## Availability

Available in bales and bulk quantities

## To order

Contact Ozbreed Pty Ltd

Phone: 02 4577 2977 Mobile: 0488 669 330

Email: [emil@ozbreed.com.au](mailto:emil@ozbreed.com.au)

## What is StayMulch™?

StayMulch™ is made from a specially bred hemp plant ‘CHG’ PBR that produces more fibre. It binds well in situ, making it more steadfast.

The unique cellulose composition, fibre strength and physical nature of this variety of hemp create a functional and highly durable mulch.

Industrial Hemp CHG PBR differs to normal hemp in that its stem has a higher fibre to hurd ratio. It is taller, has longer internodes and a thicker stem. This makes it easier to produce mulch, and provides it with better binding and morphological characteristics.

## Is hemp made mulch the same as Marijuana?

No. This specially bred hemp mulch is produced as a purpose grown mulch fibre crop. It is certified to be an industrial product, under Australian state and United Nations anti-drug protocols.

Crops of this purpose bred hemp mulch are produced under government license and comply with ultra-low THC levels. The hemp stalk produces two different materials—bast fibre (strong outer fibre) and hurd (light inner cellulose). Hemp mulch uses 100% of the hemp stalk.
