

Aussie Rambler™

Carpobrotus glaucescens 'CAR10' (L)

NATIVE SHRUBS & GROUND COVERS

Commonly called Pigface, this native variety is more tolerant of drought, humidity, frost and salt.

- Aussie Rambler™ *Carpobrotus* is a prostrate creeping succulent that has long trailing stems up to 2 metres long.
- This native *Carpobrotus* produces large, deep pink flowers in spring and autumn that can reach 14cm in diameter! The average size is 10cm in diameter.
- Great for rockeries, general mass plantings, as a sand dune stabiliser, for low maintenance gardens and inland and coastal positions.
- Better than the common form—handles heavier soils, tolerates more moisture, has much bigger flowers and more purple stems.
- Aussie Rambler™ *Carpobrotus* can tolerate moisture, but it is best to avoid wet feet.

Description	Native spreading ground cover
Density	1–2 plants per m ²
Height & Width	20cm x 2m
Flowering	Large pink flowers from Sep–May
Best Planting Time	March–November
Uses	Ground cover for coastal & inland plantings
Position	Full sun to light shade Tolerates drought, humidity & frost
Soil Type	Most soil types
