

A semi-compact form with exceptional repeat flowering throughout the year.

- Buccaneer™ Agapanthus produces unique white with purple striped flowers for a longer period, with flowers typically repeating in each season.
- In spring and summer, masses of the white/purple flowers are on display.
- A semi-compact form with good disease resistance. Buccaneer™ Agapanthus is tough, drought and frost tolerant.

Description	Repeat flowering semi-compact Agapanthus
Height & Width	50cm x 60cm; 60–80cm high flowers
Density	4–6 plants per m ² 2–4 per linear metre
Flowering	En masse Oct–Nov; sporadically throughout the year (depending on location and growing conditions)
Best Planting Time	March–November
Uses	Garden beds, borders, patio pots and planter boxes
Position	Full sun to part shade; drought & frost tolerant
Soil Type	Most soil types, but thrives in rich soil
Care	Water as required for 8–13 weeks until established; plant in a well mulched garden (chunky mulch is recommended); if required use slow release fertiliser in spring (for best flower production); remove older leaves and spent flowers stems as required
Where It Works	South QLD, NSW, ACT, VIC, TAS, SA & WA
