

Isabella®

Liriope muscari 'LIRF' (b)

HARDY EXOTIC PLANTS

Isabella® Liriope is great as a lawn alternative or garden border.

- Isabella® Liriope is good in full sun to very heavy shade.
- The one mow per year lawn alternative. It will reach 15–20cm high x 20–30cm wide when mown once per year.
- Isabella® Liriope is a better border than Mondo and a better lawn than Mini Mondo—it has improved performance in full sun, drought and frost.
- It recovers better from damage, has beautiful pink flowers and is quicker to establish than Mondo.
- The Isabella® plant can be mown because it is faster to reshoot than Mondo—it looks fresh for longer.
- Plant 6 per square metre for a lawn that will have full coverage in 18–24 months. Plant 12 per m² for quicker coverage in 9–12 months.
- For a border that will grow to full size in 18–24 months, plant 4 per linear metre. Plant 8 per linear meter if you want faster establishment in 9–12 months.
- Isabella® Liriope easily tolerates the cold of Canberra. Mow every August to remove burnt leaves in the ACT.
- For how to mow or trim garden borders, visit our website www.ozbreed.com.au.

Description	Fine leaf, compact spreading Liriope
Density	6–12 plants per m ² 4–8 per linear metre
Height & Width	40 cm x 50 cm; 15–20 cm x 20–30 cm when mown once a year
