

# Katrinus Deluxe

*Lomandra longifolia* 'Katrinus Deluxe' (b)

## STRAPPY LEAF PLANTS

An improved form of *Lomandra* 'Katrinus' with bigger flowers, a finer leaf and a more dense, compact form.

- A clean growing, uniform, non-seeding *Lomandra*.
- Looks amazing planted en masse. Also looks good in specimen plantings and commercial plantings such as roadsides, golf courses, factories and offices.
- 'Katrinus Deluxe' strengthens the soil more than any other *Lomandra* at 366%. Common *Lomandra* only strengthens the soil 50% (2007 Paananen, Layt; Study).
- Lives on natural rainfall in most populated areas in Australia. Occasional top up watering will be required in extreme drought.
- 'Katrinus Deluxe' has the best winter colour in Canberra out of all the *Lomandra longifolias* available.
- Ideal for SA and WA as it is a sterile form with excellent drought tolerance.
- Tolerates windy and salt laden windy positions, but avoid foredune situations too close to the beach.

Subtle perumed flowers

Description	Improved semi-compact fine leaf
Density	2-6 plants per m <sup>2</sup> 1.5-2 per linear metre
Height & Width	70cm x 70cm
Flowering	Masses of perumed yellow flowers from October-November
Best Planting Time	March-November
Uses	Mass planting and specimen planting
Position	Full sun to moderate shade; Tolerates cold & drought
Soil Type	Sandy, sandy loam to clay soils
Care	Water as required for 8-13 weeks until established; cut back to 20cm or half the height if required after 7 years
Where it Works	NSW, ACT, VIC, SA, WA, TAS & QLD (do not plant in depressed areas)
