Nafray® Pennisetum is a tougher, more compact variety of native Pennisetum.

- A fine textured native grass that is more drought tolerant and has better winter colour than the common form. A proven performer for 10 years.
- Nafray® Pennisetum is a non-invasive native with a low viability of seed, making it the safe choice.

### Description
Compact, clumping native grass

### Density
4–10 plants per m²
2–3 per linear metre

### Height & Width
60cm x 60cm

### Flowering
February–May

### Best Planting Time
March–October

### Uses
Mass planting for borders, rockeries and roadsides

### Position
Full sun to part shade
Tolerates frost & drought

### Soil Type
Sandy to heavy clay soils

### Care
Water as required for 8–13 weeks until established; trim 1/3 the size annually in May–Aug or as required; mulch well; use slow release fertiliser in late winter

### Where It Works
NSW, ACT, QLD, VIC, SA, WA & TAS
