

# Neon Pink™

*Iresine herbstii*

## Light up your garden with Neon Pink™ Iresine.

- Neon Pink™ Iresine has dense pink foliage and a much finer leaf compared to the common form.
- It is far more compact than the much taller growing regular form.
- Occasional pruning will keep this plant much tidier than the much larger traditional form.
- Its leaves have vivid pink ribs that stand out in any garden. Neon Pink™ Iresine adds colour quickly, as it is fast to establish, particularly in the warmer months.
- Trim annually to keep it tidy.
- Neon Pink™ Iresine is best planted in sheltered positions if light to moderate frosts are expected, and simply prune foliage in early spring.
- It looks great in 140mm pots. Simply prune once prior to sale. If foliage becomes untidy prune for new growth.

<b>Description</b>	Compact dense pink foliage shrub
<b>Density</b>	3-5 plants per m <sup>2</sup> 3-4 per linear metre
<b>Height &amp; Width</b>	40cm x 40cm
