

# Wyeena®

*Dianella tasmanica* 'TAS300' ↴

## STRAPPY LEAF PLANTS

### Wyeena® Dianella handles frost much better than other variegated Dianellas.

- A robust plant that outcompetes weeds really well.
- Striking variegated foliage that provides excellent colour contrast for mass plantings and as a feature.
- Wyeena® Dianella has cleaner foliage than other variegated Dianella types. Also better tolerates the cold of Canberra than other variegated Dianella types. Leaves can be trimmed in spring or autumn if leaf burn occurs.
- Perfectly suited for non humid environments.
- Wyeena® Dianella is not recommended for coastal use. Plant at least 2-3 km away from the coast.
- Wyeena® Dianella needs to be planted in shade in Sydney. Do not use in full sun in Sydney, except in the blue mountains. Not highly recommended for mass planting in Sydney.

Description	Tall, hardy variegated Dianella
Density	2-5 plants per m <sup>2</sup> 1.5-3 per linear metre
Height & Width	80-90cm x 80-90cm
Flowering	N/A
Best Planting Time	April-October
Uses	Mass plantings & feature plantings; commercial & residential
Position	Full sun to part shade; tolerates frost areas
Soil Type	Heavy clay to free draining soils; avoid very poor soil
Care	Water as required for 8-13 weeks until established, then water as needed; use slow release fertiliser in spring; remove dead leaves as needed or cut back every 1-3 years
Where it Works	ACT, VIC, TAS, SA, WA & NSW (not suited north of Sydney)
