

Blue Horizon™

Eremophila glabra prostrata 'EREM1' (L)

NATIVE SHRUBS & GROUND COVERS

Denser ground cover form with less gaps and blue-grey foliage

- In comparison to other varieties, the shorter internodes of the Blue Horizon™ plant provide a denser ground cover and a tidier appearance.
- This low growing plant has tidy blue foliage and beautiful yellow flowers in winter.
- Blue Horizon™ *Eremophila* is perfect for mass planting and low borders.

Description	Dense ground cover with blue-grey foliage
Density	1-2 plants per m ² 1-2 per linear metre
Height & Width	25cm x 1m
Flowering	Yellow flowers in winter
Best Planting Time	Winter, spring and autumn
Uses	Ground cover for mass plantings and gardens
