

# Cosmo Splash™

*Canna hybrid* 'AM01' (b)

EMPORIUM  
RANGE OF PLANTS

## A mid-sized Canna with green foliage and an attractive pink and yellow flower.

- Cosmo Splash™ Canna is mid-sized, with lush true green foliage. Splashes of large multicoloured pink and yellow flowers appear from spring to autumn.
- Unlike others that start off sparse and leggy, Cosmo Splash™ Canna is dense from early on. Has multiple stems that create an attractive plant, with a clumping habit.
- The Cosmo Splash™ plant provides a tropical backdrop, or feature for any garden.
- This Canna variety is heat and humidity tolerant, and moderately frost and drought tolerant. Foliage will burn in severe frost, however will reshoot in spring if established.

<b>Description</b>	A tropical, dense Canna with true green foliage
<b>Density</b>	2-4 plants per m <sup>2</sup> 2-4 per linear metre Plant 1-2m away from other plants
<b>Height &amp; Width</b>	1.4m x 1.5-2m
<b>Flowering</b>	Pink/yellow flowers from October-May
<b>Best Planting Time</b>	Spring-early summer
<b>Uses</b>	Landscapes, gardens, feature planting, screening, large pots (40cm diameter or larger)
<b>Position</b>	Full sun to part shade; moderate frost & drought tolerance, heat and humidity tolerant
<b>Soil Type</b>	Tolerates most soil, but prefers rich garden soil
<b>Care</b>	Water as required for 8-13 weeks until established, needs water in summer for best performance; plant in a well mulched garden (chunky mulch is recommended); use slow release fertiliser in spring; prune late winter 10-20cm above the ground (30-50cm for cold climates) and re-mulch if required
<b>Where It Works</b>	QLD, NSW, VIC, TAS, NT, SA & WA
