

Merlot Splash™

Canna hybrid 'AM02' (L)

The Merlot Splash™ plant is a dense Canna with lush dark purple/bronze foliage.

- Merlot Splash™ Canna has lush, dark purple/bronze foliage. It is set apart from other bronze Canna with a true tropical look, and splashes of large coral pink flowers, spring to autumn.
- Unlike others that start off sparse and leggy, Merlot Splash™ Canna is dense from early on. It has multiple stems that create an attractive plant, with a clumping habit.
- The Merlot Splash™ plant provides a colourful backdrop, or feature for any garden.
- This Canna variety is heat and humidity tolerant, and moderately frost and drought tolerant. Foliage will burn in severe frost, however will reshoot in spring if established.

Description	A tropical, dense Canna with dark purple/bronze foliage
Density	1-3 plants per m ² 1-3 per linear metre Plant 1-2m away from other plants
Height & Width	1.7m x 2m
Flowering	Coral pink flowers from October-May
Best Planting Time	Spring-early summer
Uses	Landscapes, gardens, feature planting, screening, large pots (40cm diameter or larger)
Position	Full sun to part shade; moderate frost & drought tolerance, heat and humidity tolerant
Soil Type	Tolerates most soil, but prefers rich garden soil
Care	Water as required for 8-13 weeks until established, needs water in summer for best performance; plant in a well mulched garden (chunky mulch is recommended); use slow release fertiliser in spring; prune late winter 10-20cm above the ground (30-50cm for cold climates) and re-mulch if required
Where It Works	QLD, NSW, VIC, TAS, NT, SA & WA
