

Ozbreed Aussie Box®

Westringia hybrid 'WES08' (b)

NATIVE SHRUBS & GROUND COVERS

Ozbreed Aussie Box® Westringia is a great native alternative to exotic box plants.

- Ideal for hedges, borders or mass plantings. Will also be successful in containers and general landscape.
- Produces mauve coloured flowers throughout spring/summer, with a dense growth habit.
- Can be pruned into a box, hedge or left in its natural ball shape, whilst staying compact and tidy.
- A great alternative to exotic box plants. Requires slightly more pruning, but will have faster establishment and far better drought tolerance, requiring less water.
- Requires much less pruning compared to other Westringia varieties.
- Ozbreed Aussie Box® Westringia can tolerate heavy frosts and will work in coastal plantings.
- Do not use in heavy clay soils in depressed areas where it will be sitting in water, it can cause fungal problems. This plant isn't recommended for rain gardens.
- In Queensland and Northern NSW it can grow up to 50% larger in good free draining soils, pruning is recommended in these areas.

Description	Native box hedge plant with a tight, compact growth habit
Density	2-4 plants per m ² 1.5-3 per linear metre
Height & Width	40-60cm x 40-60cm pruned 70-95cm x 70-95cm unpruned
Flowering	Mauve flowers from Sep-May
Best Planting Time	March-November
Uses	Hedges, borders, containers and mass plantings
Position	Full sun to light shade Tolerates drought & frost
Soil Type	Most soil types
Care	Water as required for 8-13 weeks until established; leave unpruned or prune to shape 1-3 times a year after flowering
Where it Works	NSW, ACT, VIC, TAS, SA, WA and South East QLD (not suited to Northern QLD)
