No Fuss, Functional, Reliable

No Fuss: plants that are easy to care for.

Functional: the right plants for the right situation. Whether its green roofs, green walls, rain gardens, roadsides or more, you will find the right functional plant for your situation.

Reliable: plants and turf that are tested and proven to work in your region.

For further technical support and information please visit ozbreed.com.au where you will find licensed growers and articles on all products.

A Guide to Our Logos

Drought Tolerant: When planted in normal gardening conditions these plants generally require no or little irrigation for most populated areas of Australia. Plants will require watering up to 8 to 12 weeks until established. They are often used on roadside plantings, where they receive almost no maintenance and no irrigation. In extra dry environments, very sandy soils and in severe drought occasional top up watering may be required in the warmer months and will provide more beautiful plants.

Cold Hardy: Will tolerate cold and frost. Check with your local grower if you are in a severely frost affected area to see if the plant is suitable.

Highly Recommended for Mass Plantings: These plants are recommended for mass plantings as they may help reduce weeds, are low maintenance and can generally be used in tough landscapes such as roadsides.

IMPORTANT NOTES

GROWER KNOWLEDGE: This is a general catalogue for the region. For local information on which plants work in your area contact your local grower (see our website). Local grower knowledge is vital, and this catalogue is no substitute.

HEIGHTS: Heights in this catalogue are for general gardening conditions. In well maintained gardens, some plants will get taller.

PLANT NAMES: In this brochure, the genus species and cultivar name are listed like this example: *Lomandra longifolia* 'LM300'. LM300 is the PBR and cultivar name. The brand name or trade name for this plant is TANIKA®, and should not be confused with the true cultivar name. The cultivar or true plant name will always immediately follow the species name enclosed in quotation marks.

POT SIZES: In general, most growers have our plants available in tubes and above. Our Advanced Trees range is available in 175mm/5L pots and above only. All other ranges are supplied in tubes and above.

Plants are Continuously Being Substituted

Substitution of plants can ruin your design. Plants that are of a totally different size, shape or texture are often substituted. Worse still, they are sometimes substituted with plants that will not perform in that situation, or even completely different species.

Why Do They Substitute?

Usually contractors substitute to save a few percent on price, which helps their profit, or allows them to win the bid. Sometimes it is the supplier selling the wrong plant.

Lomandra confertifolia: A Bad Substitute

Sometimes, *Lomandra confertifolia* types are substituted for *Lomandra hystrix* and longifolia varities even though they generally don't survive in tough landscape conditions. *Lomandra confertifolia* occurs naturally only in dry shade and does not perform well in full sun. In comparison to other Lomandra types, *Lomandra confertifolia* are weaker, smaller and unable to survive in wet feet.

Our *Lomandra longifolia* and hystrix varities including Tanika®, Katrinus Deluxe(), Nyalla® and Katie Belles™ have been proven to work in tough, low maintenance conditions for years, often staying evergreen when other varieties are browning off.

How Can You Protect Your Design From Substitution?

Ask for a certificate of authenticity in the contract or in the quality assurance documents (see below).

The contractor at the time of purchase must obtain from the supplier a certificate of authenticity that the plants supplied are authentic and true to type. The plants on the certificate must be the same as the ones in the specification.

OR

The contractor at the time of purchase must obtain from the supplier a certificate of authenticity that the plants marked with an * in the schedule are authentic and true to type. The plants on the certificate must be the same as the ones in the specification.

QUICK PLANT SELECTION GUIDE

Makes comparing and selecting plants from Ozbreed easier. Each plant has basic information such as its size, uses and position.

Height

Plants are arranged by height from smallest to tallest by foliage height, and from left to right across each spread.

More Information

Please see the Ozbreed website for more detailed information on each plant, including tolerances and suitable regions.

Density Per m2

For dense plant growth, far less gaps and quicker weed control, use the higher rate listed. For the form of the plant to be enhanced, or if you are happy to wait a little longer for weed control, use the lower rate listed. For full specimen planting with larger gaps, a lower density should be used based on your own preference e.g. The recommended rate for Tanika® Lomandra is 3-6/m^2, you may go as low as 1/m^2 but there will be no weed control. Some plants control weeds better than others, so consider this if planting for weed control.

Density Per LM

Linear metre spacing is for hedging or edging plants. As above use the higher rate listed for a denser hedge or edging.

Top Fire Retardant Plants

The top fire retardant plants in this list are based on scientific evidence and suggestions from various articles. See *ozbreed.com.au/landscape-gardening-plants-and-turf-research* for more information.

Please note that any plant can burn when exposed to enough flames and heat, it is just that some are less likely, or may take longer to ignite. For this reason you cannot rely on plant selection alone to stop bush fires, but it makes sense to use plants that generally delay in their ignition.

Know Your Lomandras

1 2 3 4 5 6 7 8

1. Evergreen Baby™ *Lomandra labill.* 'LM600' PBR
Tough, compact, fine leaf, wet feet & drought tolerant, 100% Phytophthora resistant (at time of printing). 40–45cm H x 45cm W

2. Shara™ *Lomandra fluviatilis* 'ABU7' PBR
Tidy, tough, compact, fine leaf, humidity & drought tolerant, 100% Phytophthora resistant (at time of printing). 55cm H x 50cm W

3. Tanika® *Lomandra longifolia* 'LM300' PBR *
Reliable, tough, fine leaf, very drought tolerant, low maintenance, soft evergreen foliage. 50–60cm H x 65cm W

4. Tropic Cascade™ *Lomandra hystrix* 'LHWP' PBR
Compact weeping foliage, handles periodic wet feet, highly Phytophthora resistant, good erosion control option. 60–80cm H x 60-80cm W

5. *Lomandra longifolia* 'KATRINUS DELUXE' PBR
Clean growing, uniform, great erosion control plant, can survive on natural rain fall, frost & drought tolerant. 70cm H x 70cm W

6. Nyalla® *Lomandra longifolia* 'LM400' PBR *
Toughest for coastal & salt laden winds, versatile, low maintenance, good erosion control, drought & cold tolerant. 80–90cm H x 80–90cm W

7. Lucky Stripe™ *Lomandra hystrix* 'LMV200' PBR
Reliable, tough, ultra clean variegated foliage, drought & humidity tolerant, long lived, highly Phytophthora resistant. 80cm–1m H x 90cm W

8. Katie Belles™ *Lomandra hystrix* 'LHBYF' PBR
Best performing, evergreen Australian native rain garden plant, drought, cold & coast tolerant, highly Phytophthora resistant. 1.5–1.8m H x 1.2–1.5m W

**Note: Not suited to Queensland landscapes.*

Know Your Westringias

1 2 3 4 5 6

1. Low Horizon™ *Westringia fruticosa* 'WES06' PBR *

Dense, ultra-compact ground cover Westringia. It is the lowest maintenance ground cover Westringia available. 30cm H x 70cm W

2. Grey Box™ *Westringia fruticosa* 'WES04' PBR

Provides great colour contrast with grey foliage and white flowers. Great as a low hedge, or left in its natural ball shape.
30–45cm H x 30–45cm W (unpruned), 30cm H x 30cm W (pruned)

3. Mundi™ *Westringia fruticosa* 'WES05' PBR

A tough, beautiful and versatile ground cover. Can be left unpruned whilst still maintaining a tidy form. Masses of white flowers. 40–50cm H x 1.5m W

**Note: Not suited to Queensland landscapes*

4. Ozbreed Aussie Box® *Westringia hybrid* 'WES08' PBR

A great native alternative to exotic box plants, and generally requires less pruning than other Westringias. Drought tolerant.
70–95cm H x 70–95cm W (unpruned), 40–60cm H x 40–60cm W (pruned)

5. Blue Gem™ *Westringia hybrid* 'WES03' PBR

One of the most vivid flowering Westringia available, with amazing bluish-purple flowers. Great in native gardens. 1–1.5m H x 80cm–1.3m W

6. Naringa™ *Westringia hybrid* 'WES01' PBR

One of the best hedging Westringia available for medium to tall hedges. Very fast establishing hedge, requires less pruning than other Westringia.
2.2m H x 1.5m W (unpruned), 1m H x 60cm wide (pruned)

Know Your Liriopes

1 2 3 4 5 6

1. Pink Pearl™ *Liriope muscari* 'VS001' PBR
Elegant cream and grean varigated foliage. Tough plant in both sun and shade. Vibrant pink flowers. Compact & low growing.
25cm H x 25cm W

2. Pure Blonde™ *Liriope muscari* 'LIRBLONDE' PBR
Stunning blonde foliage in spring. Clumping plant. Still tough but performs better protected from wind & full sun. Limited supply available.
30cm H x 40cm W

3. Silverlawn™ *Liriope muscari* 'LIRSS' PBR
Clean variegated foliage. Looks almost silver from a distance. Excellent low growing contrast plant. Superb lawn alternative for heavily shaded areas.
35cm H x 40cm W

4. Isabella® *Liriope muscari* 'LIRF' PBR
Great as a garden border, or as a mow once per year lawn alternative for heavily shaded areas. Better performer than Mondo in drought, full sun and frost.
40cm H x 50cm W (15–20cm H x 20–30cm W when mown once a year)

5. Amethyst™ *Liriope muscari* 'LIRTP' PBR
Compact Liriope with dark green foliage that contrast with deep purple flowers that sit well above the foliage. Grows well all over Australia.
40cm H x 40cm W

6. Just Right® *Liriope muscari* 'LIRJ' PBR
Best landscape Liriope available. Consistent height that is 'just right' for landscapes. More evergreen and works all over Australia. Rarely, if ever, produces viable seed. 50cm H x 50cm W

Know Your Lilly Pillies

1 2 3 4 5

1. **Sublime™** *Acmena smithii* 'DOW30' PBR
Lush, lime green new growth. Dense foliage to ground. Extremely Psyllid resistant. Highly Myrtle Rust resistant. 5m H x 2-3m W

2. **Red Head™** *Acmena smithii* 'BWNRED' PBR
Dense foliage with red new growth. Extremely Psyllid resistant. Highly Myrtle Rust resistant. Fire retardant. 6m H x 2m W

3. **Straight and Narrow™** *Syzygium australe* 'SAN01' PBR
Naturally very narrow growing. Excellent screen or hedge for tight planting areas. Psyllid resistant Lilly Pilly. 5-8m H x 1-1.5m W

4. **Pinnacle™** *Syzygium australe* 'AATS' PBR
Very narrow growing native tree. Provides sculptured design for tight planting areas. Requires less pruning to stay narrow. 6-10m H x 1-1.5m W

5. **Sweeper®** *Waterhousea floribunda* 'DOW20' PBR
Improved variety with heavy weeping habit. Much denser form. Highly Myrtle Rust resistant. Excellent large, dense screen. 10m H x 5-8m W

Know Your Callistemon

1 2 3 4 5 6

1. Green John™ *Callistemon viminalis* 'LJ23' PBR

Light green new growth, good contrast to Better John™ Callistemon. Denser and faster growing than Little John. Highly Myrtle Rust resistant.
60cm-1m H x 60cm W

2. Better John™ *Callistemon viminalis* 'LJ1' PBR

A 'Better John' bred from Little John. Easier to grow, quicker to establish and better blue-green toned mature foliage colour. 60cm-1.2m H x 60-90cm W

3. Scarlet Flame™ *Callistemon viminalis* 'CC19' PBR

Ultra-compact form, fine leaf, bred from Captain Cook. Beautiful rustic red new growth, showy red flowers, self cleaning. 60cm-1.5m H x 60cm-1m W

**Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state*

4. Macarthur™ *Callistemon viminalis* 'LC01' PBR

Incorporates both Little John and Captain Cook. Feature more compact growth habit and better flower presentation. Bushy & tidy growth. Myrtle Rust resistant.
1.8m H x 1.5m W

5. Red Alert™ *Callistemon viminalis* 'KPS38' PBR

Compact Callistemon hedge with vivid red new growth. Native alternative to Photinia. Part of the Ozbreed No Bees Please™ program.
2-2.4m H x 1.5-2m W (unpruned), 50cm-2m H x 40cm-1.5m W (pruned)

6. Slim™ *Callistemon viminalis* 'CV01' PBR

Know Your Dianellas

1 2 3 4 5 6 7 8

1. Aranda™ *Dianella caerulea* 'DC150' PBR
A compact, dwarf form, very tight rhizome growth, small spread. Tidy border plant, slightly arching foliage. Cane-less Dianella. 30cm H x 35cm W

2. Lucia™ *Dianella caerulea* 'DC101' PBR
Low growing, excellent spreading Dianella. Best spreading Dianella for roadsides/median stripes, low cost ground cover option. 30–40cm H x 50cm W

3. Little Jess™ *Dianella caerulea* 'DCMP01' PBR
Best selling Dianella, almost a decade of proven performance. Dwarf, clumping growth habit. Very short compact canes, low maintenance. 40cm H x 40cm W

4. Tasred® *Dianella tasmanica* 'TR20' PBR
Tough, adaptable & reliable. Best performing, biggest selling Dianella tasmanica in Australia. Great colour contrast. 45cm H x 40–50cm W

**Note: Please refer to Quick Plant Selection Guide to see if plant is compatible in your state*

5. Revelation® *Dianella revoluta* 'DRG04' PBR
Best performing Dianella through recent wet. Cleaner blue green foliage with more flowers. Can survive on natural rainfall. 50cm H x 50cm W

6. Clarity Blue™ *Dianella hybrid* 'DP401' PBR
A cross between Cassa Blue® and Utopia® Dianella. Clean blue foliage with a clumping habit. Handles periodic wet feet. 55cm H x 45cm W

7. Breeze® *Dianella caerulea* 'DCNC0' PBR
Tidy 'no-cane' variety. Tough ground cover plant. Great for erosion control. Fast establishing, spreads quickly, outcompetes weeds. 60–70cm H x 60–70cm W

8. Wyeena® *Dianella tasmanica* 'TAS300' PBR
Striking variegated clean foliage. Robust, outcompetes weeds. Very good frost tolerance. Great background plant. 80–90cm H x 80–90cm W

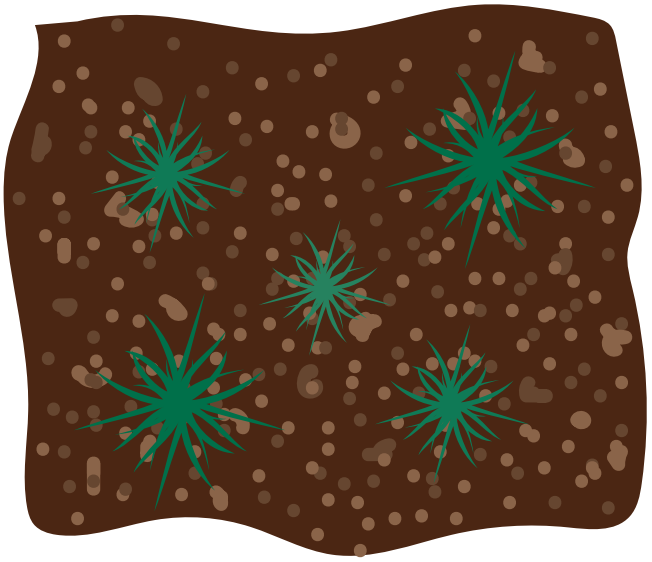
SPECIFICATION NOTES:
Roadside Plant Placement

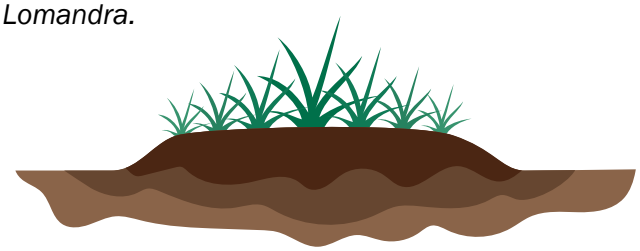
Almost no maintenance, no irrigation plants

Developed through consultation with Roads Departments and observation of road side plantings over the last 10 years. Note: If sub-standard processed mulch is used with lots of fine grade material, it can increase the likely-hood of root rot diseases. So it is recommended to only use the following plants...



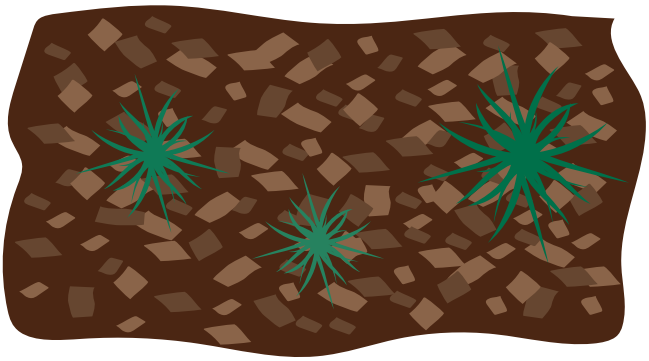
Depressed or raised with fine grade mulch

Use any of the following plants: Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra.



Raised median strips

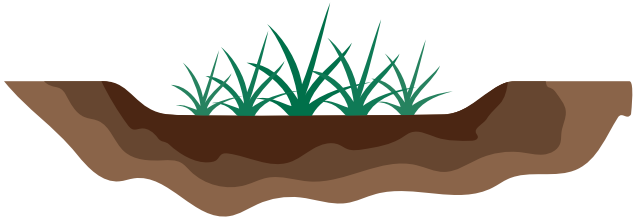
Use any of the following plants: *Tanika®, Nyalla®, Shara™ and Evergreen Baby™ Lomandra and Little Jess™ and Lucia™ (in good soils) Dianella. We suggest using coarse grade mulch with no fines for all roadside applications.*



Depressed or raised area with chunky mulch and no fines

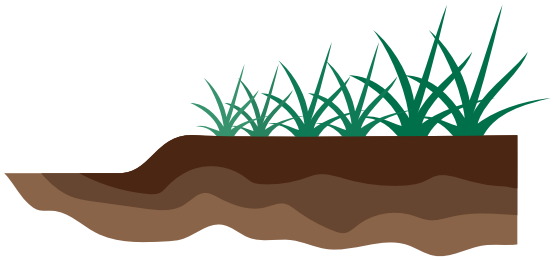
Use any of the following plants for depressed areas: *Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra.*

Use any of the following plants for raised areas: *Shara™ and Evergreen Baby™ Lomandra and Little Jess™ and Lucia™ (in good soils) Dianella.*



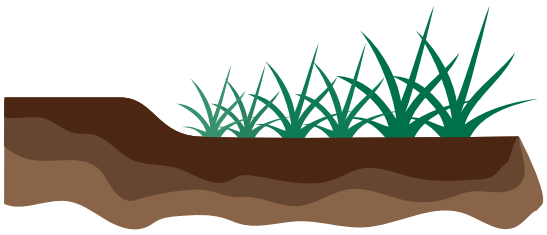
Depressed Median Strips

Use any of the following plants: *Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra. These plants cope better with prolonged wet feet, as well as dry conditions.*



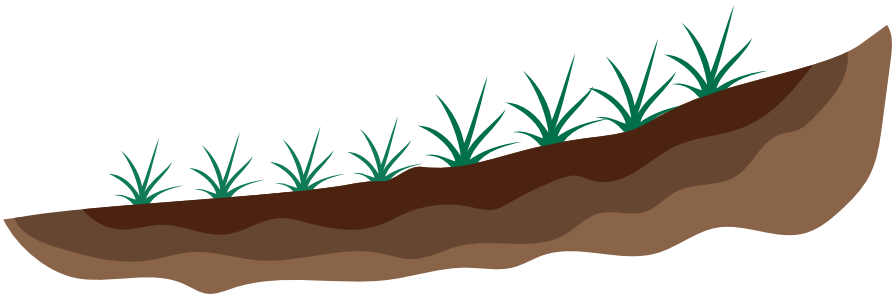
Raised areas on the side of the road

Use any of the following plants: *Shara™ and Evergreen Baby™ Lomandra and Little Jess™ and Lucia™ (in good soils) Dianella.*



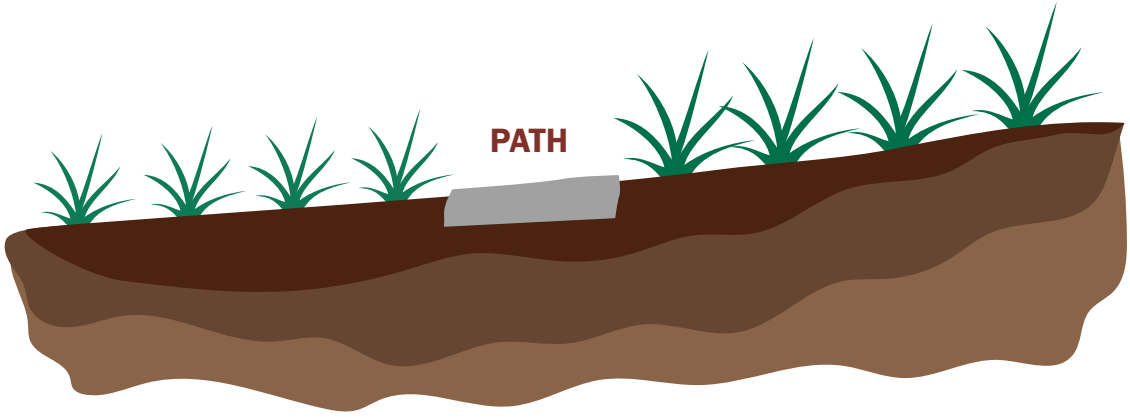
Depressed areas on the side of the road

Use any of the following plants: *Shara™, Evergreen Baby™ Katie Belles™ and Tropic Cascade™ Lomandra.*



Batters and sloping areas

Use any of the following plants: *Little Jess™ and Lucia™ (in good soils) Dianella.*



Downside of path (depressed)

Use any of the following plants: *Shara™, Evergreen Baby™, Katie Belles™ and Tropic Cascade™ Lomandra. Water running off a path or roads results in far more wet feet for plants on the down side of the path.*

Upside of path (raised)

Use any of the following plants: *Shara™ and Evergreen Baby™ Lomandra and Little Jess™ and Lucia™ (in good soils) Dianella.*

Evaluation and Development of New Green Life Alternatives for Bio-retention Swales and Erosion

Plant Erosion Control Research Update

Quantifying which plant types are best suited to surface erosion protection on slopes, batters and swales

1) Strappy leaf plants and grasses generally strengthen the soil 5 to 20 times more than shrubs and ground covers.

The following tables detail the best soil strengthening plants based on research completed.

2) Testing used a ground shear tester on replicated samples in ground and in pots.

3) This research calculates the average amount a plant strengthens the soil in percentages and kPa (kilopascals), which is useful for erosion control professionals to choose the appropriate plant.

Plant shear vane test results and statistics for Clarendon, NSW. The following plants all strengthened the soil significantly.

Groups	Difference to bare soil	Significant?	% increase vs bare soil	Shear strength kPa
Little Rev™ ■	1.39	YES	161%	22.8
Carex appressa	1.52	YES	176%	23.8

* Based on separate, later test.

● Needs cutting back every 18 months to two years.

Testing plants for inundation tolerance in Bio-retention swales.

1) Evergreen plants look better, and most importantly do not have long dormant periods of low nutrient reduction. Eg; wet feet tolerant evergreen Lomandra removes heavy metals and nutrients all year round, whilst Carex and Juncus are often brown and dormant for up to 6 months of the year.

Carex and Juncus going brown, reducing nutrient absorbtion

Lomandra

2) Many new ornamental plants that have superior looks and performance are showing good wet feet tolerance for Bio-retention swales that get periodically inundated.

3) Many of the new wet feet tolerant plants also have far superior drought tolerance.

4) New breeding has greatly increased the wet feet ability of certain plants. Eg; Westringia is not normally able to handle long periods of wet, but Grey Box™ Westringia, and Mundi™ Westringia have shown amazing abilities to handle wet.
