

Know Your Native Grasses

1

1. Yalba™ *Imperata cylindrica*

Prolific, feathery longer lasting plumes. Excellent for erosion control (strengthens the soil 5.45 times). Great for keeping debris out of waterways when planted in swales. 40cm H x 1m W

2

2. Kingsdale™ *Poa poiformis* 'PP500' PBR

Contrasting blue foliage tussock grass. Kingsdale™ Poa performs well on sloping sites that require erosion control, and is excellent for the coast. 45cm H x 45cm W

3

3. Pennstripe™ *Pennisetum alopecuroides* 'PAV300' PBR

Contrasting variegated native grass. Very compact and hardy. Tolerates frost, humidity and drought. More suitable for Australian conditions and safer choice than exotic species. 45cm H x 45cm W

4

4. Nafray® *Pennisetum alopecuroides* 'PA300' PBR

Tougher, more compact variety of native Pennisetum. More suitable for Australian conditions and safer choice than exotic species. Proven performer for over 15 years. 60cm H x 60cm W

5

5. Cream Lea® *Pennisetum alopecuroides*

Cream plumes. Excellent for mass planting. More suitable for Australian conditions and safer choice than exotic species. 60cm-1.5m (including flowers) H x 60cm-1m W

6

6. Purple Lea® *Pennisetum alopecuroides* 'PA400' PBR

Australian native with elegant purple flower heads. Excellent for mass planting. More suitable for Australian conditions and safer choice than exotic species. 80-90cm H x 80-90cm W
