

Revelation®

Dianella revoluta 'DRG04' (L)

STRAPPY LEAF PLANTS

Best performing *Dianella revoluta* through wet conditions and drought.

- This blue-green *Dianella revoluta* has cleaner foliage and more flowers.
- Medium sized *Dianella revoluta* with good erosion control capabilities.
- It will spread slightly over time and strengthens the soil 135% (2007 Paananen, Layt; Study).
- Once established, Revelation® *Dianella* can survive on natural rainfall in most populated areas in Australia. It will need some irrigation in Perth's sandy soils.
- Recent rains have caused disease in most *Dianella revoluta* types. Revelation® *Dianella* has performed better in these conditions, however it's still best to avoid depressed or wet feet areas.
