

Banana Split™

Dietes grandiflora 'D13' (b)

STRAPPY LEAF PLANTS

Provides tough, variegated foliage to make a statement in your landscape.

- This tough *Dietes grandiflora* has the usual, but highly desirable purple and white flowers you would expect, with an unusual twist—the addition of creamy yellow and green variegated foliage that stays clean.
- Banana Split™ *Dietes* works Australia wide, and is drought, heat, humidity and frost tolerant.
- Once established, it needs very little care. Simply prune every 4 to 7 years and use slow release fertiliser annually.
