

# What's New ..... 2022

*Exciting new releases from Ozbreed  
to consider for your next project*

## Colour Burst Series

These hardy native Callistemons are perfect low to mid-height shrubs to define edges, small spaces or boundary planting with their neat, dark green foliage. Bright flowers in white or a rainbow of pinks, emerge in spring, attracting birds and pollinators to the landscape. A stand out in Callistemon breeding excellence, the bright, lasting colour of these 5 Colour Burst Callistemons age to subtle and subdued hues over the flowering season. The striking colour range make them exceptional feature, or accent plants. The Colour Burst series range in height from 1-1.5m and 90cm-1.2m wide, making them perfect for reliable understorey planting. They maintain their neat compact shape over the year as informal or formal plants with little to no pruning.

### NO FUSS

Most soil types, from low quality fill to well drained sandy-loam, they will tolerate frost and drought once established.

### FUNCTIONAL

Suitable for areas where safety and sightlines need to be maintained. Snow Burst™ Callistemon is the perfect height when surveillance needs to be maintained across public playgrounds, or for line of sight on roadsides. The taller cultivars a perfect for narrow garden beds or lining driveways.

### RELIABLE

A bright native flowering shrub that will attract pollinators and people alike. Head-turning hedging or accent plant for full sun to part-shade landscapes in a variety of climatic zones.

### Candy Burst™

*Callistemon* spp 'CNU06' PBR Intended

<b>Description</b>	Semi-compact Callistemon with dark pink flowers
<b>Density</b>	1-3 plants per m <sup>2</sup>   1-2 per linear metre
<b>Height &amp; Width</b>	1-1.2m x 1-1.2m
<b>Flowering</b>	Dark pink flowers in spring
<b>Best Planting Time</b>	March–October
<b>Uses</b>	Hedges, mass planting, feature plant, specimen planting and contrast planting
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established. Plant in a well mulched garden (chunky mulch is recommended). If required use slow release fertiliser in spring. If ever required, prune every 3-4 years for a natural shape, or every 2 years for a tidy hedge.
<b>Where it Works</b>	NSW, VIC, Sth QLD, SA & WA (more testing required for Nth QLD & ACT)

Candy Burst™ Callistemon is a semi-compact fine leaf variety, that produces a burst of gorgeous dark pink bottle brush flowers in spring.

### Fluro Burst™

*Callistemon* spp 'CNU19' PBR Intended

<b>Description</b>	Semi-compact Callistemon with hot pink flowers
<b>Density</b>	1-3 plants per m <sup>2</sup>   1-2 per linear metre
<b>Height &amp; Width</b>	1-1.5m x 90cm-1.2m
<b>Flowering</b>	Hot pink flowers in spring
<b>Best Planting Time</b>	March–October
<b>Uses</b>	Hedges, mass planting, feature plant, specimen planting and contrast planting
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established. Plant in a well mulched garden (chunky mulch is recommended). If required use slow release fertiliser in spring. If ever required, prune every 3-4 years for a natural shape, or every 2 years for a tidy hedge.
<b>Where It Works</b>	NSW, VIC, Sth QLD, SA & WA (more testing required for Nth QLD & ACT)

Fluro Burst™ Callistemon produces masses of stunning fluro pink bottle brush flowers in spring, that contrast beautifully with its dark green foliage.

### Icy Burst™

*Callistemon* spp 'CNU01' PBR Intended

<b>Description</b>	Naturally narrow growing Callistemon with vibrant white flowers
<b>Density</b>	1–3 plants per m <sup>2</sup>   1–2 per linear metre
<b>Height &amp; Width</b>	1.3–1.5m x 70–80cm
<b>Flowering</b>	White flowers in spring
<b>Best Planting Time</b>	March–October
<b>Uses</b>	Hedges, mass planting, feature plant, specimen planting
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established. Plant in a well mulched garden (chunky mulch is recommended). If required use slow release fertiliser in spring. If ever required, prune every 3-4 years for a natural shape, or every 2 years for a tidy hedge.
<b>Where it Works</b>	NSW, VIC, Sth QLD, SA & WA (more testing required for Nth QLD & ACT)

Icy Burst™ Callistemon is a narrow growing fine leaf Callistemon, making it an excellent choice for tight planting areas. It produces vibrant white flowers in spring.

### Snow Burst™

*Callistemon* spp 'CNU07' PBR Intended

<b>Description</b>	Semi-compact Callistemon with white flowers
<b>Density</b>	1–3 plants per m <sup>2</sup>   1–2 per linear metre
<b>Height &amp; Width</b>	80cm–1m x 70–80cm
<b>Flowering</b>	White flowers in spring
<b>Best Planting Time</b>	March–October
<b>Uses</b>	Hedges, mass planting, feature plant, specimen planting and contrast planting
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established. Plant in a well mulched garden (chunky mulch is recommended). If required use slow release fertiliser in spring. If ever required, prune every 3-4 years for a natural shape, or every 2 years for a tidy hedge.
<b>Where it Works</b>	NSW, VIC, Sth QLD, SA & WA (more testing required for Nth QLD & ACT)

Snow Burst™ Callistemon is a beautiful compact plant with striking white bottle brush flowers in spring that contrast with its dark green fine leaf foliage.

### Sweet Burst™

*Callistemon* spp 'CNU15' PBR Intended

<b>Description</b>	Semi-compact Callistemon with light/baby pink flowers
<b>Density</b>	1–3 plants per m <sup>2</sup>   1–2 per linear metre
<b>Height &amp; Width</b>	90cm–1.2m x 90cm–1.2m
<b>Flowering</b>	Light pink flowers in spring
<b>Best Planting Time</b>	March–October
<b>Uses</b>	Hedges, mass planting, feature plant, specimen planting and contrast planting
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established. Plant in a well mulched garden (chunky mulch is recommended). If required use slow release fertiliser in spring. If ever required, prune every 3-4 years for a natural shape, or every 2 years for a tidy hedge.
<b>Where it Works</b>	NSW, VIC, Sth QLD, SA & WA (more testing required for Nth QLD & ACT)

Sweet Burst™ Callistemon is a semi-compact fine leaf variety, that produces masses of soft baby pink flowers in spring.

## Blue Horizon™

*Eremophila glabra prostrata* 'EREM1' (D)

Tidy, blue-grey undulating groundcover, adds dense, contrasting texture in mixed plantings in Mediterranean or native-style residential and commercial gardens. Spreads cloud-like, over rockeries and in garden beds, or when mass planted on verges or roadsides. The yellow flower with faint orange markings, brings warm, copper tones to the landscape in winter.

**NO FUSS** Loves the east coast. Tolerates drought and heavier soils in drier climates, in full sun to light shade.

**FUNCTIONAL** Mass planted, mounding groundcover, border planting, mixed plantings in Mediterranean style gardens.

**RELIABLE** The short internodes of Blue Horizon™ *Eremophila* creates a more compact plant with tidier coverage and more density than common varieties.

<b>Description</b>	Dense groundcover with blue-grey foliage
<b>Density</b>	1-2 plants per m <sup>2</sup> 1-2 per linear metre
<b>Height &amp; Width</b>	25cm x 1m
<b>Flowering</b>	Yellow-orange flowers in winter
<b>Best Planting Time</b>	Winter, spring and autumn
<b>Uses</b>	Groundcover for mass plantings and landscapes
<b>Position</b>	Full sun to light shade Tolerates drought
<b>Soil Type</b>	Prefers free draining, but can handle heavier soils in drier climates
<b>Care</b>	Water as required for 8-13 weeks until established; for a more manicured look prune in autumn or spring every 2-3 years
<b>Where it Works</b>	VIC, SA, WA, Sydney and Southern NSW

## Ozbreed Flat White®

*Pandorea jasminoides* 'PJ01' (D)

A native plant, with a habit like Flat Mat™ *Trachelospermum jasminoides*. Ozbreed Flat White® *Pandorea jasminoides* is the native groundcover of choice for roundabout and roadside line-of-sight plantings and where weed suppression is vital. Unlike common *Pandorea* that tend to be leggy and vigorous only at the top of the plant, Ozbreed Flat White® *Pandorea* is selected for its natural foliage density at ground level when used as a climber. Trained up a trellis, its instinct is to grow slim and vertically. When left to spread, Ozbreed Flat White® *Pandorea* will stay low and flat, only needing pruning once or twice a year. Tolerant of drought and moderate frost, the beautiful white flowers in the warmer months add interest in sun or part shade.

- NO FUSS** The abundant white, bell-shaped flowers on this native appear during spring and summer in full sun to part shade.
- FUNCTIONAL** Ozbreed Flat White® *Pandorea* is a vigorous, evergreen and lush groundcover, with dense branching and foliage to suppress weeds and in roadside applications, bedding plant or mass planting. Utilise as a climber to hide ugly views.
- RELIABLE** As reliable a choice as Star Jasmine when specified either as a climber or a groundcover. Evergreen dense foliage coverage from the ground up and attractive flower flushes during the warmer months.

<b>Description</b>	More dense, compact climber or groundcover
<b>Density</b>	1-2 plants per m <sup>2</sup> 1-3 per linear metre
<b>Height &amp; Width</b>	2-3m x 40-60cm pruned; 80cm-2m wide unpruned
<b>Flowering</b>	Pure white flowers from late spring to summer
<b>Best Planting Time</b>	March-November
<b>Uses</b>	A climber for covering fences and trellises, ideal for narrow spaces   A spreading groundcover, to suppress weeds
<b>Position</b>	Full sun to part shade; Moderate frost tolerance, drought tolerant
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established; prune a few months after planting; prune twice per year for a narrow tight climber
<b>Where it Works</b>	VIC, South QLD, NSW, TAS, SA & WA

## Aussie Flat Bush™

*Rhagodia spinescens* 'SAB01' (b)

Compact and low-growing, this native saltbush is found growing naturally in every mainland Australian state. The eye-catching, grey-blue foliage suits large-scale landscaped areas requiring weed suppression and groundcover or native and Mediterranean landscape styles. The undulating & sculptural habit and small leaf makes it the perfect plant for cloud pruning. Prune hard at the end of winter and be rewarded with vigorous spring growth.

**NO FUSS** Aussie Flat Bush™ *Rhagodia* maintains its shape with little or no maintenance. More formal and shapely with pruning,

**FUNCTIONAL** Dry slopes, bushfire prone areas, roadsides and residential gardens or landscaped public areas.

**RELIABLE** Takes to any harsh environment – naturalised in all mainland states and territories, adapted to both inland and coastal conditions.

**OZBREED EXTRA** Eye catching foliage and form both mass planted or when used as an accent plant.

<b>Description</b>	Low growing groundcover/shrub
<b>Density</b>	1–2 plants per m <sup>2</sup> 1–2 plants per linear metre
<b>Height &amp; Width</b>	30–50cm x 1m
<b>Flowering</b>	Rarely flowers
<b>Best Planting Time</b>	All year
<b>Uses</b>	Groundcover, mass planting, garden plant
<b>Position</b>	Full sun to light shade Tolerates drought & frost
<b>Soil Type</b>	Most soil types including heavy soils
<b>Care</b>	Water as required for 8–13 weeks until established; in gardens prune twice per year for best look; infrequent pruning on road sides
<b>Where it Works</b>	VIC, NSW, ACT, QLD (non humid inland areas), SA, WA

## Coastal Pink™

*Correa alba* 'COR10' PBR Intended

In native or Mediterranean-style landscapes, the delicate, rounded leaf adds to the textural contrast in the shrub layer. Branches boast the attractive bronze tones of *Correa alba*, while its dark green foliage is complemented by the light pink bell-shaped flowers that set it apart from the common *Correa alba* form.

- NO FUSS** Copes well in windy and coastal sites with good salt tolerance.
- FUNCTIONAL** Bird attracting, native or Mediterranean landscapes, hedging.
- RELIABLE** Excellent deep green shrub layer planting with contrasting foliage.

<b>Description</b>	Medium coastal shrub
<b>Density</b>	1–2 plants per m <sup>2</sup>   1–2 plants per linear metre
<b>Height &amp; Width</b>	2m x 2m; can be pruned twice a year to keep it at a smaller size
<b>Flowering</b>	Light pink bells in winter/early spring
<b>Best Planting Time</b>	Autumn, winter or spring
<b>Uses</b>	Coastal, bird attracting, shrub layer between trees, mass planted as a medium sized shrub or as a small to fence-sized hedge
<b>Position</b>	Full sun to light shade. Tolerates drought & frost
<b>Soil Type</b>	Preferably reasonably drained soil, however it is adaptable to most soil types
<b>Care</b>	Low water requirements once established; prune once per year to maintain semi-compact habit or twice per year for a really tidy appearance; prune to desired shape and fertilise with slow release native fertiliser
<b>Where it Works</b>	VIC, ACT, SA, WA, TAS, Southern NSW and Sydney (in good draining soils)

Evergreen Baby™ (front) really is the baby Lomandra of the family.

*Lomandra longifolia* (common form) is 2.5 times the height of unpruned Evergreen Baby™, after 7 years of growth.

## Evergreen Baby™

*Lomandra labill.* 'LM600' (L)

A compact, tough Lomandra with attractive deep-green, fine foliage. About half the size of Tanika® Lomandra, Evergreen Baby™ Lomandra is suited for low line of sight planting requirements or as foreground plants to create a layered effect in residential or landscaped designs. Looks good while tolerating intermittent wet feet and dry periods.

- NO FUSS** Hardy, small *Lomandra longifolia*-cross, which is low maintenance in full sun to part shade. Frost and drought tolerant in sandy loam to heavy clay soils.
- FUNCTIONAL** Mass plant in coastal locations, native gardens, pots, rain gardens, bio-retention swales, borders or as a feature plant.
- RELIABLE** A non-seeding form, making it safer to plant near bushland and national parks, with golden-yellow flowers in spring.
- OZBREED EXTRA** Want lime green foliage? Applying agricultural lime annually and increasing the soil pH, or in naturally occurring alkaline soils, Evergreen Baby™ Lomandras foliage responds by becoming more lime coloured.

<b>Description</b>	Compact fine leaf clumping plant
<b>Density</b>	4–8 plants per m <sup>2</sup> 2–4 per linear metre
<b>Height &amp; Width</b>	40–45cm x 45cm
<b>Flowering</b>	Yellow flowers in spring
<b>Best Planting Time</b>	March–November
<b>Uses</b>	Mass planting, feature plant, borders
<b>Position</b>	Full sun to part shade; tolerates frost, drought and periodic wet feet
<b>Soil Type</b>	Sandy loam to heavy clay
<b>Care</b>	Water as needed until established; cut back 15cm above the ground every 3–5 yrs if required; occasional watering in dry periods may be needed
<b>Where it Works</b>	VIC, QLD (does not work in northern QLD), NSW, ACT, SA & WA

Deep rhizome activity makes it the toughest blue-hued *Lomandra* in the market.

## Pacific Sky™

*Lomandra confertifolia* subsp. *rubiginosa* 'LM700' PBR intended

A blue-hued *Lomandra confertifolia* with strong rhizome activity that has seen it perform better in heavy soils and full sun than other *L. confertifolia* trial plants. The dense fine-leaved foliage and arching habit adds appeal to mass plantings, mixed species clumped plantings and native or Mediterranean style landscapes. The yellow, perfumed flowers in spring contrast beautifully against the blue tones of the foliage.

**NO FUSS** In shaded and dry areas under tree canopies or difficult garden beds situated below a building's overhang.

**FUNCTIONAL** Native and Mediterranean landscapes, mass planted, borders, rockeries, accent planting and in dry shade.

**RELIABLE** The ground-hugging habit of this *Lomandra* aids in weed suppression, while keeping soil moist.

**OZBREED EXTRA** The vigorous rhizome activity of this *Lomandra confertifolia* subsp. *rubiginosa* contributes to its hardiness in the ground and low maintenance beyond normal establishment period.

<b>Description</b>	Dense, ground hugging, blue foliage <i>Lomandra</i>
<b>Density</b>	2-5 plants per m <sup>2</sup> 1-2 per linear metre
<b>Height &amp; Width</b>	50-70cm x 60-90cm (up to 1.2m wide at maturity)
<b>Flowering</b>	Perfumed yellow flowers Sept - Nov
<b>Best Planting Time</b>	Mar-Nov
<b>Uses</b>	Border edging, mass planting, accent planting near rockeries, difficult dry spots under trees
<b>Position</b>	Full sun to heavy shade; drought & frost tolerant
<b>Soil Type</b>	Wide variety of soils, sand to heavy clay, avoid wet feet
<b>Care</b>	Water as required until established; if needed cut back 15cm above the ground every 3-5 yrs if required
<b>Where It Works</b>	VIC, Central NSW, South NSW, SA & WA (further testing required for other regions)

## Hardy Aloes

**Our Aloes bring an architectural, contemporary look to the landscape and brighten the winter season with their iconic flowers.**

The popularity of succulents in the Australian landscape is soaring, due to their durability, resistance to heat and striking architectural forms. The rosette-shaped, self-cleaning foliage looks great year-round, mass planted or used as a feature in pots and in mixed plantings. Their bird attracting flower spikes cover the plants in autumn and winter, brightening up the landscape in the cooler seasons. Where soil depth or water availability is low, Aloes come into their own, thriving on little maintenance. Hardy enough to withstand roadside and street planting, their compact mature height makes them perfect when maintaining low line of sight requirements.

**NO FUSS** Ozbreed Aloes require far less water during establishment phase, perfect where sites are difficult to irrigate when installing. Low maintenance in full sun to part shade and suited to most soil types – however mound or condition soil if planting into heavy clay.

**FUNCTIONAL** Mass planted, borders, specimen or accent plant, mixed planting and in pots.

**RELIABLE** Cooler season flowering introduces golden sunset hues that contrast against the striking textured greens of the Aloe foliage. Drought and frost tolerant.

### Sea Urchin™

*Aloe hybrid 'ANDsea'* PBR Intended

<b>Description</b>	Compact, tight and dense Aloe
<b>Density</b>	6–12 plants per m <sup>2</sup> 3–6 per linear metre
<b>Height &amp; Width</b>	30cm x 30cm; 50cm high flowers
<b>Flowering</b>	Orange flowers in winter and spring
<b>Best Planting Time</b>	March–November
<b>Uses</b>	Mass planting, garden borders, specimen plantings
<b>Position</b>	Full sun to part shade; frost, heat and drought tolerant
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as needed for 8–13 weeks until established; cut back every 4–5 yrs if required; fertilise with slow release fertiliser yearly
<b>Where it Works</b>	VIC, NSW, ACT, TAS, SA, WA & QLD (not suited to Nth QLD)

The dense, tight, blue-green foliage of Sea Urchin™ Aloe is more compact than its common Aloe form. Its prolific orange flowers in later winter and into spring contrast with the self-cleaning, blue-green foliage. Happy in most soil types but in humid weather Sea Urchin™ Aloe needs free draining soils to avoid rot and disease. Will thrive in full sun to part shade.

### Mighty Coral™

*Aloe hybrid 'ALO4'* (D)

<b>Description</b>	Semi-compact Aloe
<b>Density</b>	3–6 per m <sup>2</sup> 2–4 per linear metre
<b>Height &amp; Width</b>	35 cm x 40cm foliage; 60cm high flowers
<b>Flowering</b>	Orange and cream flowers in early–mid winter
<b>Best Planting Time</b>	March–November
<b>Uses</b>	Mass planting, borders, feature plant
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types, but if in clay soils, try to improve drainage or use in raised garden
<b>Care</b>	Water as required for 8–13 weeks until established; fertilise yearly with slow release fertiliser, cut back spent flowers if desired
<b>Where It Works</b>	VIC, South QLD (raised gardens and free draining soil), NSW, TAS, SA, WA & ACT (requires further testing here)

Mighty Coral™ Aloe's pale orange and cream flowers give it a coral pink hue at a distance. Flowering from early to mid-winter on a multitude of stems that reach high above the foliage, the many flower blooms retain their colour and shape for an extended period. A clumping Aloe form and semi-compact in stature to 35cms, tolerant of drought and frost.

### Mighty Gold™

*Aloe hybrid 'ALO2'* PBR Intended

<b>Description</b>	Compact, tough Aloe
<b>Density</b>	4–8 per m <sup>2</sup> 3–6 per linear metre
<b>Height &amp; Width</b>	25 cm x 35 cm foliage; 55cm high flowers
<b>Flowering</b>	Gold flowers in cooler months
<b>Best Planting Time</b>	March–November
<b>Uses</b>	Mass planting, border and specimen plantings
<b>Position</b>	Full sun to part shade
<b>Soil Type</b>	Most soil types, but if in clay soils, try to improve drainage or use in raised garden
<b>Care</b>	Water as required for 8–13 weeks until established; fertilise yearly with slow release fertiliser, cut back spent flowers if desired
<b>Where It Works</b>	VIC, South QLD (raised gardens and free draining soil), NSW, TAS, SA, WA & ACT (requires further testing here)

The golden yellow flowering blooms that give Mighty Gold™ Aloe its name appear during winter and pick up the golden-orange tones in the spiky margin of the foliage. Iconic spots on the leaf help to maintain interest throughout the rest of the year. A compact and tough succulent that makes a statement when mass planted in beds or decorative pots to create an accent or focus. An Aloe that will handle short periods of wet feet, as well as drought.

## Velvet Sky™

*Metrosideros collina* 'MB01' PBR Intended

It's the exciting, eye-catching, inky-blue stems and leaves that really sets Velvet Sky™ *Metrosideros* apart from the rest. The showy, red-orange flowers that bloom in spring create a beautiful contrast to the blue-splashed, mid-green foliage. A mid to tall shrub that suits stand-alone, accent planting or makes a great dense screen or hedge.

**NO FUSS** In full sun or part shade where the inky blue stems are even more prominent, Velvet Sky™ *Metrosideros* adds vibrant colour to the landscape.

**FUNCTIONAL** Accent or specimen plant, mixed planting palettes and mid to tall height hedging and privacy screening.

**RELIABLE** Dense growth habit and reliable, compact form requires only an annual prune to keep tidy.

<b>Description</b>	Compact <i>Metrosideros</i> , inky blue stems
<b>Density</b>	1 plant per 1-5 m <sup>2</sup> 1 plant per 0.5-2 linear metre
<b>Height &amp; Width</b>	2-4 m x 1-3 m (can be smaller in cooler climates)
<b>Flowering</b>	Red flowers in spring
<b>Best Planting Time</b>	September - November
<b>Uses</b>	Hedge, small screen, specimen plant
<b>Position</b>	Full sun to light shade; Light - moderate frost & moderate drought tolerance once established; Salt tolerant.
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established; prune once per year for tidy hedge
<b>Where It Works</b>	Sth QLD, NSW, VIC, SA & WA (Protect from frost in cooler climates)

The Sweet Privacy™ plant (behind) is taller than Murraya Min A Min (D) (front)

## Sweet Privacy™

*Murraya paniculata* 'MP01' PBR Intended

A dense screening hedge adorned with beautiful, white fragrant flowers from spring to autumn. Lower maintenance than regular *Murraya* form and just as reliable planted as a tidy hedge that is neither too big or too small. In full sun to part shade and in most soil types, hide unsightly views with this perfect *Murraya*.

- NO FUSS** A drought hardy, long-lived tough shrub that is naturally compact and bun-shaped.
- FUNCTIONAL** Screening, privacy hedge, perennial evergreen shrub layer, pollinator attracting or specimen plant.
- RELIABLE** Prune for preference. Looks good when its natural bun-shape is enhanced, or in more formal, clipped styles. Regular pruning will result in a tighter, more dense growth habit.

<b>Description</b>	Screening hedge, less pruning than the common form
<b>Density</b>	1 per m <sup>2</sup> 1-2 per linear metre
<b>Height &amp; Width</b>	1.8-2.5m x 1.5m
<b>Flowering</b>	White, sweet smelling flowers in spring and late summer – early autumn
<b>Best Planting Time</b>	September-May
<b>Uses</b>	Screening, hedging, specimen shrub
<b>Position</b>	Full sun to part shade.
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8-13 weeks until established; use slow release fertiliser yearly; prune twice per year, or up to 3 times a year for very tight hedging
<b>Where It Works</b>	VIC, QLD, NSW, NT, SA & WA

**Thin Red™**  
*Photinia x fraseri* 'NP01' PBR Intended

Perfect small footprint hedging plant for narrow garden beds and shrinking backyards that still allows full use of the garden for recreation. Small white flowers bloom in mid to late spring while new growth appears in flushes of red.

- NO FUSS** Full sun to part shade and successful in most soil types.
- FUNCTIONAL** Narrow hedge or privacy screen, requiring an annual prune to encourage growth or more regular pruning for a more formal finish.
- RELIABLE** Prune regularly to maintain hedge height at desired level when mature.

<b>Description</b>	Narrow hedging plant with red new growth
<b>Density</b>	1 per m <sup>2</sup> 2 per linear metre for screening
<b>Height &amp; Width</b>	3-4m x 60cm
<b>Flowering</b>	Small white flowers in mid to late spring
<b>Best Planting Time</b>	March–November
<b>Uses</b>	Screens, hedges for narrow spaces
<b>Position</b>	Full sun to part shade; frost tolerant
<b>Soil Type</b>	Most soil types
<b>Care</b>	Water as required for 8–13 weeks until established; use slow release fertiliser annually; prune 1–2 times a year
<b>Where It Works</b>	VIC, South QLD, NSW, ACT, TAS, SA & WA

WHAT'S GOES INTO A NEW PLANT?

# Plant Breeding and Testing

Did you know that the average Ozbreed plant undergoes 5-10 years of rigorous testing before it is released to the market? Read on to find out why Ozbreed plants have been a staple for landscape professionals for over 20 years and are renowned for their no fuss, functional and reliable landscape plants.

Staff at Ozbreed inspecting breeding stock for trials

Tanika® Lomandra (right) stays green when common grass (left) goes brown

Yalba™ Imperata (left) has a better roots for erosion control than common form (right)

Katie Belles™ Lomandra in artificial creek bed for testing

Little Jess™ Dianella (left) survived when common form (right) died in roadside trial

## BRED FOR PURPOSE

There are lots of places to get inspiration from when considering a new breeding project. Ozbreed starts by listening to our Landscape Professional Network to breed plants that aren't just an improvement on common varieties, but that also solve a problem.

Whether it be hedges for shrinking backyard sizes, groundcovers to control weeds, strappy leaf plants that can survive the neglect of life on the roadside or native grasses that can hold hillsides together, Ozbreed plants are bred for a purpose.

## TESTED IN EXTREME CONDITIONS

New products are put to the test at the Ozbreed Clarendon Testing Facility. Here, they push the plant to their limits to see what they can survive. Then they are tested even further with our growing partners all over the country before being commercially released. A huge variety of factors are put to the test, including:

Disease and Pest Resistance

Different Soils

Drought and Flood

Extreme Heat and Cold

Habit Uniformity

Low Maintenance

Shade

Invasiveness

Tanika® Lomandra in playground mulch trial

Swale trial testing Grey Box™ and Mundi™ Westringias in artificial creek bed

## SPECIAL PURPOSE

Going above and beyond, Ozbreed also conducts trials to see their plants potential for special purposes.

Some recent trials include testing of plants for use in green walls, green roofs, playgrounds, swales, rain gardens and erosion control. They also test for special conditions such as salt tolerance and fire-retardant abilities. For example, Tanika® Lomandra was found to be a safe option for fall zones in playgrounds as well as having the ability to survive when planted in playground mulch.

## WE DON'T GUESS, WE TEST

Once the new plant is thoroughly tested at the Clarendon Testing Facility, they are then tested again Australia-wide through Ozbreed's growing partners before being commercially released. From humid tropical weather in Queensland to freezing nights in Tasmania, it is known with certainty which plants will thrive and which won't survive. With detailed guides on each plant, you can choose the right plant for the right place with confidence.

When you choose an Ozbreed plant, you are backed by over 20 years of breeding experience and an average of 5-10 years of thorough testing on each plant. When Ozbreed says "we don't guess, we test", they certainly mean it!

Double Gold™ Gazania is bred to be a non-invasive alternative to the common form
