Flora MoundTM

Plectranthus cilcilatus 'PLEC 801' (b Intended

LANDSCAPE FLOWERS

Resilient emerald mounding ground cover with rippled leaves, and autumn blooms.

- This Plectranthus forms an emerald carpet or mound, featuring ground-hugging growth with a rippled horizon.
- Its green leaves with burgundy chocolate undersides provide visual texture and interest.
- In autumn, Flora Mound™ bursts into vibrant bloom, adding colour to the seasonal transition.
- Adapts well to heat, thriving in warm climates, and tolerates light to moderate shade.
- Evergreen in light frosts, foliage regreens in spring after moderate frost burn. Avoid heavy frost areas.

Physical Description	Lush, mound-forming ground cover
Planting Density	50cm to 100cm apart
Height & Width	Foliage: 20cm to 40cm high Depending on shade level. Flowers: 30cm to 50cm, x 1m W
Flowering	Produces stunning tall flowers in shades of purple and white in autumn
Best Planting Time	September to early April. Avoid summer planting if full sun
Uses	Ideal along driveways or paths, mass planting, specimen planting, cottage garden.
Position	Full sun to moderate shade. Light to moderate shade only in regions that regularly get above 40 degrees
Soil Type	Adaptable to various soil types
Care	Water regularly to keep soil consistently moist, trim for shape, and provide well-draining soil for optimal growth
Where it Works	QLD, NSW, VIC, TAS, NT, SA & WA
