Salvia 'SALO2' (b

Where it Works

LANDSCAPE FLOWERS

Distinguished for enduring strength and resilience, this Salvia excels in tough, challenging environments.

- This Salvia is one of the toughest and hardiest, and long lived options for the landscape market.
- Withstood Windsor's temperature challenges, excelling in cold and hot climates for 6 years, all plants surviving.
- The plant graces the landscape with vibrant, intense red flowers, adding a striking visual element.
- Notably, in trials, there is no observed self-seeding, ensuring controlled growth.

Physical Description	Forms a robust, compact dense structure of foliage and flowers
Height & Width	75cm H x 70cm W
Flowering	Abundant, vivid red flowers, for much of the year. Flowers often
Uses	Ideal for mass planting, specimen plant, and borders along paths, cottage gardens
Position	Full sun to part shade
Soil Type	Adaptable to various soil types, even heavy soils
Care	Requires minimal care, prune post-flowering for shape or looks. Has performed well without pruning for many years. Maintain regular watering for optimal growth and vibrant blossoms
