

Great White™

Lomandra longifolia 'MURU'

STRAPPY LEAF PLANTS

A variegated form of Lomandra with bigger flowers and a more dense, compact form.

- A clean growing, uniform, non-seeding Lomandra.
- This plant is similar to 'Katrinus Deluxe' Lomandra, but with a variegated twist.
- Looks amazing planted en masse. Also looks good in specimen plantings and commercial plantings such as roadsides, golf courses, factories and offices.
- Lives on natural rainfall in most populated areas in Australia. Occasional top up watering will be required in extreme drought.
- Tolerates windy and salt laden windy positions, but avoid foredune situations too close to the beach.

Description	Semi-compact, variegated fine leaf
Density	4-6 plants per m ² 2-3 per linear metre
Height & Width	40-50cm x 40-50cm
Flowering	Masses of perfumed yellow flowers from October-November
Best Planting Time	March-November
Uses	Mass planting & specimen planting
Position	Full sun to moderate shade Tolerates cold & drought
Soil Type	Sandy, sandy loam to clay soils
Care	Water as required for 8-13 weeks until established; prune as required
Where it Works	Southern NSW, VIC, SA, WA, TAS; requires free draining soils or light to moderate shade in Sydney; not suitable for Queensland unless in areas like Toowoomba
